LEED AP

National Recycling Coalition

National Association of Environmental Professionals

Water Environment Federation

TN Recycling Coalition

TN Women in Green

You may not know Wilmot Inc, but if you live or work in Nashville, your life has been touched by the company's expertise. From skyline changing mega-projects like Music City Center and the Titan's Coliseum to less noticeable projects like the Water Department's Energy Management Program. Wilmot is an innovator in saving resources, money, and sustainable and low-impact design. Tiffany Wilmot and her team provide clients with smart, high performance approaches to improve health, protect the environment, and save money.

Since 1994, Wilmot has set the standard, managing a wide array of public and private sector projects for diverse clients such as GM, the US Army, Metro Nashville, Vice President Al Gore, and the Coors Co.

Wilmot Inc also advocates for sustainable practices in a variety of public and community groups. Ms. Wilmot has been selected by two administrations to work with the Mayor's sustainability and livability committees. She is an Adjunct Professor at Vanderbilt University and has also taught at Lipscomb University. Ms. Wilmot co-founded TN Women in Green (TWIG), an organization that empowers, inspires, and connects women committed to environmental sustainability. She was also part of the creative team for Eco-Logical, a non-profit organization dedicated to instilling positive environmental values in school age children. In one year, Eco-Logical helped 4th graders plant 80,000 trees.

Ms. Wilmot is 1 of 6 national experts selected to write the U.S. HUD Development study entitled, "Feasibility Study of Deconstruction as an Economic Development Strategy."

In 2012, based on her experience in the green building industry, USGBC licensed her to teach all LEED curricula as a member of USGBC Faculty.

## NOTABLE PROJECTS

### Centennial Park Master Plan, Nashville, TN

Coordinated public relations activities with Metro agencies. Organized and conducted multiple public input sessions and made recommendations to design team and steering committee.

### Energy Management Program, Metro Water Services, Nashville, TN

Provides recommendations to reduce energy and increase efficiency on large-scale water and wastewater projects at all Metro Facilities.

### Music City Center, Nashville, TN

Facilitated LEED compliance for Bell/Clark at \$600M downtown convention center contributing to LEED Gold certification. Proposed material reuse program to save owner \$2M.

### Mayor's Livable Nashville Committee, Nashville, TN

Serving Mayor Barry on the Green Building committee to develop recommendations to make Nashville the "greenest city in the Southeast".

### Low Impact Development Demonstration Project, Nashville, TN

Contributed to design and communication plan of multiple LID devices for commercial and residential demonstration at Green Hills Library.

### OAP Construction Management, Metro Water Services, Nashville, TN

Enhanced Nashville's Overflow Abatement Program by incorporating sustainable vision and goals into design and construction practices.

**Titan's Coliseum, Nashville, TN** Managed one of the largest C&D recycling projects in the US, saving owner \$500K. During the 2.5-year project, Wilmot Inc reclaimed 80,000 tons of material.
