FLIP

INTRODUCTION

The Common Core is a set of standards introduced in 2012 by the Department of Education. These standards outline the necessary skills a student needs to develop in English Language Arts (ELA) and Mathematics by the end of their school year.

ELA

MATH

2019 APRIL

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
	01	02 ELA State Exam Day 1	03 ELA State Exam Day 2	04 ELA State Exam Day 3	05	06
07	08	09	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30				

The Common Core ELA exam is usually taken in April. The ELA exam took place from April 2 to April 5 in 2019.

2019 MAY

SUNDAY	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY	SATURDAY
	01 Math State Exam Day 1	02 Math State Exam Day 2	03 Math State Exam Day 3	04	05	06
07	08	09	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	31			

The Common Core Math exam is usually taken in May. The Math exam will take place from May 1 to May 3 in 2019.

LEVELS

1

2

3

4

The Common Core exams are scored on a scale from 1 to 4. All students should strive to achieve a score of 3 or 4 on the exam. A student's score on the exam reflects their understanding of the Common Core Standards; something that many selective schools look out for during the admissions process. This is why it is very important for students to prepare as much as possible for these exams.

OUR PROGRAM

Synergy Prep strives to push all students to their ultimate limit and help them achieve the best grades possible in school and on the state exams. Here's what our program consists of:

The Basics

Time

Our Common Core program is held on two days of the week. One day of the week our students are taught ELA for a 2-hour session. The other day they are taught Math for a 2-hour session.

Lesson Plans

Each 2-hour session consists of a carefully, well-thought out lesson plan created by our instructors. These lesson plans will go over the topic of the day which usually revolves around a specific Common Core standard.

Classwork & Homework

Classwork consisting of main points from the lesson plan are given to the students to assess their knowledge of whatever was taught to them by the instructor. Afterwards, instructors review the classwork with students. Answering any and all questions. Instructors grade the work and returns it to the student. Homework is given at the end of a session and is reviewed the following week.

Ratios

To ensure the utmost quality, we make sure that students are taught in ratios of 4-6 students to one instructor. Doing this will provide students with a more personalized teaching experience and give them the attention they need.

THE AMENITIES

Synergy Prep offers certain amenities that will take a student's learning experience to the next level. Our goal is to make sure that students fully understand whatever is being taught to them so that they can take those teachings and apply them to the best of their ability on the state exam.

V I R T U A L L E A R N I N G

Synergy Prep has revolutionized the way students learn by introducing Electronic Learning or Virtual Learning into our Common Core program. Virtual Learning allows students to learn outside of the classroom. Students can take what they learned in Synergy Prep and really drill the concepts into their heads. Here's what comes with it:

- A database of 10,000+ ELA and Math questions that target any standard
- Extra assignments on top of weekly classwork and homework for more practice
- Score reports, breakdown of topics, analytics and extensive data tracking

R E P O R T C A R D

In order for us to keep track of how our students are doing in class we record their grades for all classwork, homework, quizzes, and tests. Report cards are created and given to the parent so that they are aware of the student's progress. Here's what appears on the report card and what comes with it:

- An average of all the student's grades on a monthly basis. This includes classwork, homework, quiz, and test grades
- The instructor's comments on how the student performed throughout the month and what his/her strengths and weaknesses are
- A breakdown of which standards/topics were covered on a class by class basis

C R A S H C O U R S E

The Crash Course is an 8-week long program which is meant to give as much test prep as possible to students so that they are more familiar with the Common Core state exam and provides them with the tools to do well. Here's what students will learn:

- Skills and strategies to help you choose the best answer on the actual exam
- Review of the most problematic standards from the Common Core curriculum and how to tackle corresponding questions
- Multiple full-length practice ELA and Math exams

SCREENSHOTS

Using our Virtual Learning, instructors can choose from any Common Core standard to assign work to students. They can also choose from an enormous library of questions for each standard.

We will make sure that the concepts are drilled into your head and that you can answer any questions that come your way.

Grade 4 Weekly Math Assignment 3/21 July 05,2018

INSTRUCTOR COMMENTS

This is where you talk about how the student performed over the course of 8 sessions. Feel free to put in any comments regarding the student's behavior but make sure you give good feedback. This could include praising the student or giving constructive criticism. Some questions to ask yourself are:

What are the student's strengths/weaknesses?

How can I help the student with his/her areas of difficulty?

What actions can the student take to help himself/herself?

Are there any behavioral issues I have to address?

Score Report

Overall Grade:

Parents can track their child's performance with our monthly report cards. The report card will show the student's understanding of several different Common Core Standards. This will include the scores of classworks, homeworks, quizzes and tests.
