

Klise ColumnTrack™. So simple.

One look is all you need to understand that ColumnTrack is as simple as it is smart. First, design your column by selecting the pieces—base blocks, columns, center spools and end spools—to create the column you want. To assemble, line up and connect the parts using our unique track-and-spline system*, then attach the column unit to your cabinet, mirror or furniture. The result is a modular customized column unit that looks like a one-piece turning. Our perfect part alignment and tight connections make each column look great—at a fraction of the cost of a single piece of turned wood. All of our ColumnTrack products are half-round, and available standard in Hard Maple, Red Oak, and Cherry.
