

SUMMER PLAY SESSIONS

- ❖ Sessions will be 50 minutes long.
- ❖ Each group will consist of 1 adult and 2 children.
- ❖ Children will be paired based on language level and age.
- ❖ Scheduling will be based on child's availability.

Join us this summer for play sessions!

- ❖ For children ages 3-8
- ❖ Groups are designed for children with social-pragmatic difficulties related to autism, apraxia of speech, sensory processing difficulties, language delays, or other social difficulties
 - ❖ Session plans developed by a speech-language pathologist
- ❖ Groups led by an experienced professional (inclusion teacher, ABA therapist, facilitator, or play therapist)

Overview

These groups are designed for the child who is not yet ready for our social skills camps. This 2:1 opportunity will allow your child to target specific social pragmatic skills, while maintaining the structure and controlled sensory environment that individual therapy offers.

Skills Targeted

Our groups will focus on a combination of: Joint attention/engagement, turn taking, asking/answering questions, gaining attention, personal space, etc. We adapt each group based on the children and their specific strengths and weaknesses.

Activities

All sessions will have a variety of sensory/movement, games/toys, arts and crafts, books, etc. Both structured and unstructured activities are included to facilitate spontaneous use of skills and carryover/maintenance.

Collaboration

To best assist your child, we willingly communicate with parents, caregivers, teachers, and other professionals in your child's life.
