“New Hampshire’s population is Aging... The population age 65 and over will almost certainly double in the next two decades.” ¹

“By the year 2020, the state’s shift towards an older population will reach a peak. And by 2030, nearly half a million Granite Staters will be over the age of 65...Carroll County...is projected to have the highest share of the population over the age of 65 of any New Hampshire county.” ²
