Water Matters! Fly-In is a two-day event sponsored by AWWA where representatives from each state convene in Washington DC to meet with their respective congressional delegates, since 2002. This year’s AWWA Water Matters! Fly-In took place April 13th and 14th. The purpose of these meetings is to advance AWWA’s legislative issues on Capitol Hill, boost name recognition of AWWA and its members and establish our water professionals as sources of knowledge and expertise on drinking water issues with members of Congress and their staff.

I had the honor of representing the Hawaii Section as the At-Large Trustee.

We began the two-day event with a morning briefing, updates and discussions of current drinking water issues before Congress, and issues we want to bring before Congress. The two main issues were “Invest in the Nation’s Water Infrastructure” and “AWWA Supports Assistance to Communities Impacted by Lead.” The remainder of the time was spent meeting with the members of Congress. I met with staff from all four of Hawaii’s congressional offices. I was able to meet with Senator Brian Schatz for a brief moment, as he was between sessions. I was also able to take part in the Thursday morning “coffee” session with Senator Mazie Hirono. I felt that all staffers and Senators were very receptive and supportive of the two issues at hand.

Invest in the Nation’s Water Infrastructure – The Water Infrastructure Finance and Innovation Act (WIFIA) was passed in 2014 to provide low-cost federal loans to finance up to 49 percent of water/wastewater improvement projects that cost $20 million or more. So far, the program has only received funding for EPA continued on page 2.
AWWA Water Matters! Fly-In, continued from page 1

…to set up the program and funds have not been made available for disbursement. WIFIA is authorized at $35 million in FY2017. Because of this, AWWA is requesting support from our legislators to urge the appropriate committees to fully fund WIFIA, State Revolving Fund at $1.3 billion each for water and wastewater and to support legislation to remove the volume caps for Public Activity Bonds (PAB) for water projects.

AWWA Supports Assistance to Communities Impacted by Lead – As we are all aware, lead in our drinking water is currently a hot topic since the Flint, Michigan incident. Lead issues are not just an issue faced by Flint, Michigan but by so many other utilities that face an aging infrastructure. AWWA was seeking support for public education and notification provisions of HR4470 and funding assistance of S2579.

I found the Fly-In very rewarding. I was able to meet with other representatives from across the nation and discuss similar issues we face here in Hawaii. Being able to make a difference, even if it’s a small one, will certainly make an impact in the future. There were two things that stood out for me during this trip. One, being surrounded by others with the same goal and passion I have for water, our most precious resource. And two, just being in DC with its rich history, architecture, and of course the food. §
Chair’s Message
By Jeffrey Pearson
Hawaii Section Chair

I can see the end of my term coming on June 1, 2016 when our new slate of officers will step in. The infamous Michael Street will take the reins as Chair, with Juanita Colon assuming the Vice Chair position. Susan Mukai is already working as and will be the At Large Trustee - Conference Committee Chair. This has been a fun year as Chair of the AWWA Hawaii Section. I could not have done it alone, and I truly appreciate the help and support of the Executive Committee. Those Executive Committee members returning are: Director Ken Ota and Treasurer Audrey Yokota. John Chung will be stepping down as Secretary, and I will be replacing Joanna Seto as Immediate Past Chair.

In April, Juanita Colon, our current At-large Trustee – Administrative Policy & Council and future Vice Chair, attended the AWWA Fly-In to Washington D.C. Please see her article in the newsletter. It sounded like both a fun and productive trip.

As part of the Hawaii Section providing continuing education to our members, a workshop was recently held on Maui on May 6, 2016. The workshop topic was “Achieve and Maintain Compliance with the SDWA.” That stands for the Safe Drinking Water Act, for the few of you that may not know. The workshop was sponsored by a grant from EPA through AWWA National, with RCAC’s Joy Gannon and Adriane Skinner providing the one-day training. It was well-attended with about 40 operators taking part. Thanks also to Jay Stone and Trevor Inouye for helping put this all together.

Coming soon is ACE 16, the annual AWWA National Conference held in Chicago this year. The conference will take place June 20-22, 2016. Ross Kaneko will be honored at the conference as the recipient of the Fuller Award. Congratulations Ross!
The final big occasion to take place will be the Regional Meeting of Section Officers (RMSO) for the Western Region V. Each year officers from the western states meet on national issues, including membership, messaging, and providing value to our members. This year the RMSO for Western Region V will be in Honolulu at the Hilton Hawaiian Village on December 5 and 6, 2016. With our own Mike Street, the future Chair, as host, I expect a high class meeting experience. Of course you will have all of our support, Mike.

Again, this has been a good ride as Chair for the Hawaii Section. When Joanna Seto asked me a couple of years ago if I was interested in this position, I thought she had me confused for someone else. Well, I am glad she asked, and I sure do not regret accepting.

Aloha. §
Director’s Message

By Ken Ota
Hawaii Section Director

A

CE 16 – June - Hawaii Section will be bringing some Aloha to Chicago! We are all looking forward seeing all of you in the big city – education, networking, and Chicago hot dogs!

Current Updates from the Association:
With the recent water crisis in Flint, MI, AWWA and the Association of Metropolitan Water Agencies are providing a Lead Resource Community: Lead - American Water Works Association. The site provides essential resources for corrosion control, Standard Methods, and latest legislative developments.

The following items were approved by the Board on our last meeting:
- B100 Granular Filter Material
- B101 Precoat Filter Media
- B114 Reverse Osmosis and Nanofiltration Systems for Water Treatment
- B507 Phosphoric Acid
- B600 Powdered Activated Carbon
- B603 Permanganates
- C215 Extruded Polyolefin Coating for Steel Water Pipe
- C217 Microcrystalline Wax and Petrolatum Tape Coating for Steel Water Pipe and Fittings
- C541 Hydraulic And Pneumatic Cylinder and Vane-Type Actuators
- C671 Online Turbidimeter Operation and Maintenance
- C707 Reaffirmation: Encoder-type Remote Registration Systems for Cold Water Meters
- C751 Magnetic Inductive Flowmeter
- C904 Crosslinked Polyethylene Pressure Tubing ½”-3” for Water Service
- C909 Molecularly Oriented Polyvinyl Chloride PVCO 4” and Larger
- D106 Sacrificial Anode Cathodic Protection Systems for Submerged Surfaced of Steel Water Storage Tanks
- D107 Composite Elevated Tanks for Water Storage
- D115 Tendon-Prestressed Concrete Tanks
- C104/A21.4 Cement-Mortar Lining for Ductile Iron Pipe and Fittings
- C517 Resilient-Seated Cast-Iron Eccentric Plug Valves
- C542 Electric Motor Actuators for Valves and Slide Gates
- C750 Transit Time Flowmeters in Full Closed Conduits

A big MAHALO to all of the volunteers for your help with the Hawaii Section! Your time and commitment in running workshops and supporting the board are integral in making the Hawaii Section NO KA OI. It truly is a pleasure and honor to be working with all of you. §
The Western Pacific Subsection held its Second Annual Conference at the Lotte Resort on Guam on April 11-12, 2016. There were 135 attendees, including some from targeted neighbor islands as well as some from as far away as New York and Notting Hill, Australia. The opening remarks were given by Subsection Chair Paul Kemp and by Guam Waterworks Authority’s (GWA) General Manager and Subsection Secretary, Miguel Bordallo.

Topics ranged from the Keynote speech by Jeff Theerman from Brown and Caldwell who spoke on “Tapping Into Your People – They have what it Takes” through pending regulatory issues, aquifer management on tropical islands, the value of regular system maintenance programs, and critical monitoring issues such as pH and turbidity. The Subsection was able to tap into backgrounds ranging from consultants, academicians, system operators, USGS, and vendors. Details are available at http://www.awwa-hiwps.org/2016-conference.html under the “Conference Presentations” tab.

The Subsection also added a trade show this year with seven participants including vendors from Hawaii and Australia as well as local suppliers.

The conference culminated in a field trip to the Guam International Airport Water System and the Guam Waterworks Authority Water Meter Calibration Shop.
On June first, the new Subsection Chair will be Geigy Salayon, and the new Vice Chair will be Lisa San Agustin. The other board members and officers will remain the same: Secretary Miguel Bordallo, Treasurer Melissa Schaible, and Trustees Bill Gilman and Ken Rekdahl, and Paul Kemp will become the Past Chair.

The Subsection Board and Planning Committee met on May 27 to schedule the next year’s activities. A recap of this meeting will be included in the AWWA Hawaii Section Summer Newsletter. §
Second Annual Small Water Systems Training Recap

By Jay Stone
At-Large Trustee—Conference Committee

On May 6, 2016, AWWA-Hawai‘i Section and the Rural Community Assistance Corporation (RCAC) held the second annual small water systems training at the Kahului Courtyard Marriott. The workshop provided a comprehensive overview of Safe Drinking Water Act (SDWA) regulations and distribution system operations and maintenance. The workshop covered a wide list of topics including:

- source water assessment and protection;
- regulations;
- disinfection and disinfection byproducts;
- distribution system infrastructure, water quality, and flushing;
- main breaks and cross connections; and
- safety.

Joy Gannon and Adriane Skinner from the RCAC were the workshop instructors.

Forty-three people, mostly operators with at least one engineer, from county, federal, and private water systems on Maui, Kaua‘i, Moloka‘i, the Big Island, and O‘ahu attended the workshop.

AWWA Hawai‘i Section was able to offer the workshop for free (except for food and beverage costs) to staff of small water systems due to an Environmental Protection Agency (EPA) grant. Mahalo to the EPA, AWWA National, and the Rural Community Assistance Partnership for the grant funds and support this year. Mahalo also to all the attendees and their organizations for supporting the workshop and to Joy and Adriane for an educational and fun presentation. §
WWA Hawai‘i Section was proud again to be a sponsor of this year’s 59th Annual Hawai‘i State Science and Engineering Fair (HSSEF) that took place at the Hawai‘i Convention Center on March 28-30, 2016. Our second straight year being a bronze-level sponsor, the HSSEF represents the brightest of Hawai‘i students that have competed for months in school and district science fairs leading up to this, the big one, the state’s only statewide student science fair. Each year, students from grades 6-12 put their parents’ generation’s ideas of what a science fair project should resemble to shame as they demonstrate their breadth of knowledge of more than just the old adage of the 3-Rs: Reading, Writing and Arithmetic. These remarkable students, instead, take the HSSEF’s focus on the new Science, Technology, Engineering and Mathematics (STEM) learning to new heights with projects such as this year’s Senior Division Top Overall State Winners, titled, “Biochemical Characterization and Imaging of Arc: Insights into Neurodegeneration and Alzheimer’s Development,” “Evaluating the Phenotype of Macrophages in the Pathology of Endometriosis,” and “Sea Level Rise and March of the Molokai Mangrove; The Socioeconomic and Environmental Impacts of Sea Level Rise and Introduced Red Mangrove (Rhizophora mangle) on Molokai, Hawaiian Islands.”

This year, in addition to sponsoring the overall HSSEF, AWWA Hawai‘i Section was proud to sponsor two new special agency cash awards for projects that best represented the mission of AWWA, which is to provide solutions for the efficient management of water. A big congratulations to our inaugural award winners:

- **Ian Denzer** (Kealakehe High School) – “The Optimization of Telemetry Transmitter Locations at the Natural Energy Laboratory of Hawai‘i Authority (NELHA)”
- **Ariana Kim** and **Sreelakshmi Kutty** (Team Project: St. Andrew’s Priory) – “Novel Utilizations of Globally Invasive Algal Species: Environmental and Economical Implementations of Fermented Macroalgae”

continued on page 10
A big mahalo goes out to our volunteers who represented AWWA Hawai‘i Section this year! Juanita Colon and Mark Ohigashi volunteered to be non-judge project safety checkers on Monday, March 28, a day before the science fair. Students were allowed to set up their project displays and volunteers were there to make sure that students’ displays met dimensional, safety and content rules. While working, it was a great opportunity to see all of the hard work and time that each student and student-mentor put into their projects and to “talk story” with them in an informal setting before the “real thing” the next day. In addition, Delwin Ching graciously volunteered to be a judge for the Hawai‘i Science Academy to select winning projects for a variety of different categories. Again, thank you to our volunteers and we hope for even more next year!

The staff and volunteers at the Hawai‘i Science Academy who organize the HSSEF do a great and selfless job in securing a science fair for the state to make sure that Hawai‘i is well-represented at the Intel International Science and Engineering Fair (ISEF) held each year in different cities across the country. AWWA – Hawai‘i Section is honored to be a continuing sponsor for the HSSEF’s efforts and looks forward to continuing this support in the future. For more information with projects, pictures and winners from the 59th Annual HSSEF and the upcoming ISEF, please visit http://www.hawaiiacademyofscience.org/ and https://student.societyforscience.org/intel-isef.

YP Field Trip to Mari’s Garden
By Travis Ota
Young Professionals Social Committee Co-Chair

Sustainable practices are on the rise. To get a better understanding of how these practices work, the AWWA and HWEA Young Professionals took a tour of Mari’s Garden on Saturday, May 21 in Mililani. Mari’s Garden is a farm specializing in aquaponics and hydroponics that grows a vast number of vegetables that you may find at your local Farmer’s Market, Whole Foods, Safeway, or Foodland stores.

Aquaponics/hydroponics is a form of sustainable farming that uses waste produced by fish to supply nutrients to plants, which in turn purifies the water in a recirculating cycle. YP was led on a private tour of the farm hosted by Ryan Tsutsui. He showed everyone how the facility operates from greenhouses accommodating rows of hydroponics systems to ponds that breed and raise fish for farming and consumption. The tour provided an educational insight to help protect our natural resources and help in our efforts to justify sustainable methods of local farming. §

From left to right: YP Social Committee Co-Chair Brittney Higuchi, YP Chair Jessica Agsalda, and YP Vice Chair Mark Ohigashi
On March 10, 2016, HWEA/AWWA Young Professionals (YP) teamed up with ASCE Younger Member Forum (YMF) to put on the 5th annual Student Engineering Night at Webling Elementary School. Volunteers from both organizations came together to run four activities for the forty 4th–6th graders who were in attendance. Activities included an experiment where the students tested which ratio of flour to sand to water performed best in a slump test and an activity where students were challenged to design and build a water system to deliver clean water to a house and a wastewater system to transport the wastewater to a wastewater treatment plant. At the water/wastewater activity, students learned about where our water comes from and how it is delivered to their homes and what happens to wastewater after it leave their homes. They also learned valuable lessons about pumping and water conservation. YP volunteers from the Board of Water Supply graciously volunteered to run another station at which the students learned about their water footprint and the value of water. Overall, it was a fun and educational night for the students, parents, and volunteers alike!
On February 23-24, 2016, the HWEA/AWWA Young Professionals (YP) Co-Chair and Chair, Mark Ohigashi and Jessica Agsalda, attended the YP Chair Training and YP Summit in San Diego, California. The two days were jam packed with training and social events in which YP members from across the country took part.

The YP Chair Training was held on the first day of conference. Attendees included leaders from various YP sections. After attendees had breakfast and introduced themselves to the whole group, the AWWA President, Gene Koontz, spoke about AWWA membership and current events. Then Meredith Quinn, AWWA YP Committee Chair, gave a presentation on AWWA as a whole and how members progress within the organization. YP committee members from the North Dakota Section, Minnesota Section, and Rocky Mountain Section also gave presentations on successful YP events they’ve held in their states. During the day, attendees split into groups in order to focus on different subjects related to YP—membership retention, social media, outreach, etc. Within each group, YPs talked of issues and challenges their section has come across and brainstormed solutions to these problems. These brainstorming groups were a great way to get ideas from different YP sections. Some challenges for YP Hawaii Section includes encouraging YP members to take part in events or getting more involved in leadership roles. Therefore, a few takeaways from the YP Summit included interesting event ideas for field trips and outreach, and how to use social media to get members more aware of YP and what we do.

The YP Summit was held on the second day of the conference and welcomed all members of YP. This day was less focused on YP related issues and more focused on leadership training and career related goals. Presentations included how to be a good leader and manager and how to improve your public speaking skills.

Overall, the conference was a great way to get a feel for the AWWA as a whole and how the organization works together. It was also a great way to speak with members of other YP sections and to get more ideas to bring back home. §
On Thursday, March 24, 2016, HWEA/AWWA Young Professionals (YP) held a general meeting and social at Side Street Inn (Ala Moana). About 15 members were in attendance, and as usual, YP hosted pupus. At the event, YP Chair and Co-Chair, Jessica Agsalda and Mark Ohigashi, spoke on lessons learned at the recent YP Chair Training and announced any upcoming events. These events are always a great way to network with fellow HWEA and AWWA members and allows prospective members to get a feel for the organization and get information on how to get more involved.

Newsletter Advertising

The Hawaii Section of the American Water Works Association (AWWA) is currently seeking advertisers for its quarterly newsletter. Advertising provides a direct message to a population of over 600 members statewide who are in need of the products or services being advertised. Although we have switched to electronic distribution of the newsletter, we feel that there is still equal benefit to advertising in the electronic newsletter as with the printed newsletter. In addition, advertising in the electronic newsletter can be in full color.

Please be aware that advertising in the newsletter is available only to businesses related to the drinking water field. Please also note that all advertisements will be submitted for review and approval by the AWWA Hawaii Section Board of Trustees for ad content.
