Thank you to everyone who attended the 2019 Pacific Water Conference! We had another great turnout with over 850 registered attendees, which does not include the number of individuals registered as exhibitors. We also had a record number of 133 exhibitor booths at this year’s conference!

For those of you who have not been on the conference committee before, the Pacific Water Conference planning starts around June of the prior year with monthly meetings to plan out the technical sessions, food and refreshments, publications, golf tournament, and much more. The committee is made up of about 35 volunteers from both the public and private sectors, and each volunteer puts in this hard work on their own time. These committee members and day-of volunteers, who help with registration and moderating and assistant moderating technical sessions, are the backbone of the conference, and I would like to thank them for making the conference a huge success.

The Tuesday Pre-Conference was attended by over 250 people and featured four tracks: 1) Water Operators, 2) Wastewater Operators, 3) Wastewater, and 4) Young Professionals (YP). Following the Pre-Conference, the YP group held their annual conference social at Odori-Ko across the street from the Hawaii Convention Center. The YP socials are an excellent way for YPs to connect with each other outside of work, and it is a great chance for older professionals to interact with the YPs and impart their wisdom.

This year, the AWWA Hawaii Section welcomed AWWA President David Rager, his wife Susan, and AWWA Section Relationship Manager Katie Koch to our conference. The Section held its visiting officer reception on Tuesday evening, where we also welcomed Water Research Foundation Chief Executive Officer Robert Renner. Thank you to Vice Chair Kevin Ihu for planning such a wonderful event, and we were grateful that
our esteemed guests could join us!

The 2019 Pacific Water Conference main conference officially kicked off on Wednesday, February 20. The Pipe Tapping competition took place between the Big Island and Honolulu Board of Water Supply pipe tapping teams, with the Honolulu BWS team coming out on top. The Honolulu team is made up of Ben Meria, Chad Kamalani-Coleman, Chris Morris, and Evan Kaneshiro, and they will be competing at the AWWA Annual Conference and Exposition in Denver, Colorado this summer, so please make sure to cheer them on if you are attending.

The winning team of AWWA’s other competition, Top Ops, was comprised of Joy Gannon, Lea Tamayose, and Kate Prescott. The Top Ops competition is a competitive question-and-answer tournament where teams are asked a broad range of technical questions.

The AWWA Hawaii Section was proud to give out three scholarships this year: 2 student scholarships and 1 operator scholarship. The recipients of the student scholarships are Alison Appelgate and Sabrina Diemert and the recipient of the One AWWA Operator Scholarship is Ash Hooks. The Section also held its student poster competition and recognized the top three posters, with Kristin Dembia placing third, Adrienne Fung placing second, and Mukunda Kaushik from Northeastern University taking home first place.

continued on page 3
The Hawaii Section also recognized our Exhibits Chair Rich Hopkins with the 2019 Outstanding Section Member Award. Rich has been an integral part of the AWWA Hawaii Section, and though he does not live here, he has made the annual conference exhibition into the success that it is today.

The main conference concluded with the Thursday evening banquet, where the current AWWA Hawaii Section board members were recognized for their efforts and incoming board members were installed. The highlight of the banquet was when the AWWA George Warren Fuller Award was given to Joanna Seto, Chief of the Department of Health Safe Drinking Water Branch and former AWWA Hawaii Section Chair. Congratulations Joanna for all you have done!

Thank you again to all who attended this year’s conference. We would love to hear your suggestions on how we could improve the conference, and please fill out our survey at https://www.surveymonkey.com/r/2GXBP7C.

As this was my last year heading the conference, I would like to introduce our 2020 Pacific Water Conference Co-Chairs: Jessica Agsalda, Ken Kawahara, and Amanda Tanaka. They are going to do an amazing job heading next year’s conference, so please mark your calendars down for February 4-6, 2020.

---

Hawaii Section Vision Statement

Hawaii Section of the American Water Works Association will be the leading force in the State of Hawaii dedicated to safe drinking water.
Chair’s Message
By Mark Ohigashi
Hawaii Section Chair

Aloha!

Over six years ago, the Board of Trustees of the AWWA-Hawaii Section had the foresight and courage to enter into agreement with our local chapter of WEF, the Hawaii Water Environment Association (HWEA), to put on the first joint annual conference on the subject of water. While this baby of a conference had its challenges taking its first steps, the conference has grown up into a toddler who is advanced for its age because of the hard work of our volunteer planning committee and its conference co-chairs. For a toddler to boast that there are over 100 technical sessions over three days, 730 attendees, 134 exhibitor booths, exhibition demonstrations and competitions, a golf tournament, and an environmental volunteer project day, is an amazing accomplishment. I want to thank Susan Mukai, our outgoing Annual Conference Council Trustee, who has served the Hawaii Section for the past 3 years as Conference Co-Chair and made the Pacific Water Conference what it is today, one of the largest gathering of water professionals in the Pacific. I would also like to thank Jessica Agsalda for stepping into the conference trusteeship and pledging to continue and build upon Susan’s work to get our water operators their continuing education units (CEUs), our members connected with manufacturers, providing a forum to learn about all the facets of water that contribute to our one water, and connecting us all in a collegial environment.

The reason why I want to highlight our valued partnership with HWEA is because while, traditionally, our organizations...
The Board of Directors recently held their winter meeting in Vancouver, BC, on January 25-26. Part of the take back message for the sections are the update of the year end results of the 2018 Business Plan and the 2019 Goals for the AWWA.

Regarding the year in review of the 2018 Business Plan; of the 40 metrics identified in the plan, 32 are completed, 7 are in progress and one has not been completed in 2018. Of those that are still in progress, they are the pension termination, Lead Copper Rule, Data Warehouse, SharePoint, and AWWAIndia membership and training.

Significant completions of the plan include:

**Member Engagement and Development**
- Membership count stabilized over 51,000 (Avg of 51,894)
- Wiley Transition
- AWWA.org
- Student Program
- Veterans Program

**Organizational Stewardship**
- Strong financial performance; exceeded operating benchmarks
- Water Equation meets its stretch goal of $235K
- Governance changes
- Community Engineering Corps

**Knowledge Creation and Exchange**
- ACE 18 success
- Education strategy
- Total Water Solution revised strategy
- Standards (ANSI audit)

**Water Policy and Leadership**
- Fly in
- Farm bill

For 2019, the goals include:

**Member Engagement and Development**
- Member satisfaction
- Community of interest
- Membership growth

#AWWAHawaii
Student and Operator Scholarship Recipients

By Jeffrey Pearson and Ken Ota
Scholarship Committee Chairs

This year the Hawaii Section gave two academic scholarships of $3,000 each and one Operator scholarship of $1,000. This is the first year that the One AWWA Operator Scholarship was given out by the Hawaii Section.

The academic scholarships went to two worthy individuals. Alison Appelgate, daughter of Lisa and Bruce Appelgate, is a senior in high school with a 3.9 GPA. She has decided to study neuro-biology and neuroscience. Sounds simple enough to me. She then wants to continue on in college to get her medical degree and become a pediatrician. She has not decided yet on her college, but hopes to stay in her home state of California. She lives, eats and sleeps running. She was chosen captain for cross country, and also captain of her long distance team for Track and Field. She works part-time and has already moved up the ranks at her job.

Our second scholarship winner is Sabrina Diemert. Sabrina applied for herself and is an active member of the AWWA-Hawaii section. She is working on her Doctorate at UH Manoa and only has a 4.0 GPA, all A+ except maybe one class. Her studies include Molecular biology and Bio-Reactor Design and Analysis. She is now working on Iron Reducing bacteria as a possible alternative wastewater treatment. After graduate school she hopes to work at a consulting firm and work in the reclaimed water side, looking at managing or mitigating biofilm and also do design work with biological treatment.

She has worked as an Environmental Advisor, which brought her to Honduras. She also worked at a Drinking Water Advisory group, as a project Manager, at the University of Toronto. She is also active with student clubs at UH Manoa.

These two women are both excellent candidates for this year’s academic scholarships. Good luck to both of you two in your future studies.

Our first ever One AWWA Scholarship winner is Ash Hooks. Mr. Hooks has been a Water Treatment Plant Operator from 2013. He is an operator primarily at the new Iao Water Treatment Plant in Wailuku, Maui, for the Maui Department of Water Supply. He plans on attending this and other conferences to gain knowledge related to water quality and water treatment and earn his needed CEU’s. Congratulations Ash for earning this scholarship.

Next year we will again offer two academic scholarships for $3,000 each, and one operator scholarship for $1,000. All Hawaii Section member in good standings who are either students, or have children entering college or in college are eligible to apply. Later this year the application forms will be available to all interested.
have been separated by drinking water and wastewater, we often forget the impact that each has on each other. We should remember that, more or less, each drop of water that our drinking water professionals provide is actually a drop of water that is being reused and may have even come from wastewater—children learn this in school as the water cycle. This basic lesson is often lost in the politics and monetization of water, but this is something that we should keep front of mind moving forward as our water resources dwindle and become scarce. This is also something that I think my predecessors recognized when joining forces to create the Hawaii Water Conference, and subsequent Pacific Water Conference. I look forward to the future and I hope that you will join me in continuing to embrace our wastewater colleagues as what they are, fellow water professionals.

In that same spirit of unity, while many of us may be traveling from across the Pacific to get to 2019 Annual Conference & Exposition (ACE) in Denver, Colorado, June 9-12, 2019, there is always one stop for Hawaii Section members, and that is the Hawaii Section General Membership Meeting and Reception. This year, the meeting/reception will be held on Sunday, June 9, 2019, at a location and time to be determined. Please save the date and give all of your support to our 2019 ACE speakers, national committee members, national competitors, and our incoming Hawaii Section Chair, Kevin Ihu!

Director’s Message, continued from page 5

Organizational Stewardship
- Strong budget
- Improve innovation funds
- Service provider engagement
- Grants
- Section Governance
- Community Engineering Corps
- Personify Upgrade

Knowledge Creation and Exchange
- ACE19
- New Standards/Manual platform
- Education platform
- Inspire Innovation
- International Program
- AWWAIndia

Water Policy and Leadership
- Thought Leadership Brief
- Value of Water Campaign
- Resilience/Cyber Security’Water Matters Fly-in
- Farm bill
- Lead Copper Rule

If you want to know more about the goals noted, please let me know and I can provide more detailed information on them.
Hafa Adai,

The American Water Works Association, Hawaii Section, Western Pacific Subsection (AWWA-HIWPS), is proud to announce that we are having our 5th Annual AWWA-HIWPS Water and Wastewater Conference on April 25 and 26, 2019 at the Hyatt Regency Guam. We have grown each year since we started this conference in the Western Pacific and last year, we had over 140 participants take part. We look to continue that trend once again this year.

This year’s conference theme is *Improving the Islands’ Water Resources Resiliency*. With the powerful typhoons our islands experienced this past year (e.g., Super Typhoons Mangkhut and Yutu), it is vital that we share our experiences and learn from it. Further, our islands are susceptible to other natural disasters, and without adequate preparation and responsiveness, there is a high potential for significant damage to our islands’ water resources and infrastructure. This year’s theme provides an opportunity for our island communities to collaborate and share their proactive and reactive measures they use in response to these natural disasters. As a result of this conference, attendees will learn about available technologies, resources, and administrative and operational procedures to enhance water resources system resiliency and responsiveness to natural disasters. If anyone is interested in participating or would like to submit an abstract and would like more information, please contact myself (g watson@brwncald.com), Paul Kemp (paulkemp@guamwaterworks.org), or Ken Rekdahl (kmrekdahl@dcaguam.com).

Our Subsection is always looking for ways to grow our training program, not just for operators, but also for others in our local industry. While we have held multiple classes to prepare operators for required tests, we are looking to expand into other areas, such as corrosion control classes for engineers or incorporating a Continuing Education Unit (CEU) system for operators. We have also started a technical library that our members can access for resources training and professional growth.

Finally, we are exploring various avenues to support the newly founded University of Guam School of Engineering. Avenues we are considering include monetary donations, scholarships, book donations for the new engineering library, and laboratory equipment donations, all of which are needed.

Si Yu’us Ma’ase’

American Water Works Association

Dedicated to the World’s Most Important Resource™
The summit was held on February 6th to 8th at AWWA Headquarters located in Denver, Colorado. Temperatures reached well below zero, getting as low as (-) 10 degrees Fahrenheit. On the first day of the conference it snowed more than six inches, over four hours. The AWWA Membership Summit was a gathering of different sections from around the country, Canada, and Mexico. Sections gathered to discuss what members of AWWA are looking for in their membership, and what AWWA can do as an organization to better meet the needs and demands of its members and non-members. A study by McKinley Advisors found that the top three reasons people are a part of AWWA are; (1) To connect and collaborate with others in the industry, (2) To support the profession/water industry, (3) To receive AWWA publications and updates on the latest developments in the water industry. The study also found that only 56% of our members in the Hawaii section, have someone at AWWA that they can call or contact if they have a question or need. A list of Committee(s) and their chairs can be found here: https://hiawwa.org/committee-chairs. Please contact any of the chairs to get involved.

Another topic discussed at the membership summit was the use of social media to connect better with members. How many of you have a hard time finding information or connecting with the section? The AWWA Membership committee has partnered with the Young Professional committee and started an Instagram (IG) page for all to connect. Make sure to follow the section profile, and invite other non-members to follow along. The IG page will be a great way to stay up to date on upcoming section events, continuing education credit opportunities, and the latest from the local water industry. Please feel free to send your pictures or tag us in any water industry related posts! §
Coated for Life.

- A quality coating system, combined with appropriate cathodic protection, ensures the longest service life possible for buried metallic pipe.

- Corrosion shortens pipe service life but is also preventable using proven, cost-effective measures.

- Even non-metallic pipe materials will lose strength and corrode over time.

- Northwest Pipe Company offers steel pipe with a range of AWWA coatings to meet the demands of differing soil types and environmental conditions—making steel the ideal choice for mid to large-diameter water and wastewater applications.

Northwest Pipe Company is the largest manufacturer of engineered steel pipe systems for municipal water and wastewater applications in North America.

Young Professionals Update  
By Travis Ota  
Young Professionals Committee Chair

The 2019 Pacific Water Conference has finally come to an end. The AWWA/HWEA Young Professionals have been busy socializing, networking and learning from the various experienced local and national water leaders throughout the conference. There were a number of new young professional faces in the committee this year, a positive lead in our goal to become water leaders for the future.

The conference has its usual Pre-Con day, with the Young Professionals gaining career knowledge and advice from some local and national leaders established in the water industry. Some of the speakers included were: Barry Usagawa, Puna Kaneakua, Katie Koch, Mike Young, Anne Symonds, Cliff Lum, Audrey Haerle, Nicole Nakaoka and AWWA’s very own Ken Kawahara. Thank you to these amazing water industry leaders for doing your part in passing down your wisdom and intellect to the future generations of the industry.

As usual, the YP track ended with a social at Odori-Ko, with around 25 guests involved or will be involved in future YP events.

Left: Katie Koch, one of the speakers for the YP Pre-conference track. Center and right: YPs enjoying some great food and networking at Odori-Ko.
No Water, No What? Scan the Code and Enter to Win!

CONTEST RULES

Imagine a world without water. What in your life wouldn't you have without water?

Email joue@hbws.org with any questions.

1. Prize: One (1) year of AWWA membership, paid for by the Hawaii Section.
2. No limit on the number of entries per person.
3. Must provide name and contact information to be eligible to win.
4. Must be in good taste and not conflict with the professional image of the Association or Section.
5. Must be related to Hawaii, its culture, its people, etc.
6. Winner(s) will be selected by members of the AWWA Hawaii Section Board and Membership Committee. Multiple winners may be chosen.
7. Duplicate entries will be credited to the person who submitted the entry first via the Google Form.
8. By submitting an entry, the entrant is giving expressed permission to the AWWA Hawaii Section and Association for the graphic’s and/or slogan’s promotional use and distribution.
9. The following campaigns are currently registered or trademarked by AWWA:
   - No Water (No Beer), (No Coffee), (No Shower), (No Wine), (No Chai), (No Lemonade), (No Bath), (No Chowda), (No Whiskey), (No Waves), (No Orchard)

Registration and housing are now open! Visit https://events.awwa.org/

Please save Sunday evening (June 9, 2019) for the Hawaii Section Reception.

Location and time to be announced.
2018 Membership Tenure Awards

AWWA honors significant membership tenure with the following awards, determined as of June 30 of each year. The recognition builds with years with the Association.

To be eligible, members must meet the qualifications for each award as detailed below:

**Silver Water Drop Award**

25 cumulative years of membership

- Lisa L. Appelgate
- Michael I. Matsuo
- Lance Oyama
- Jason H. Takaki

**Life Member Status**

30 cumulative years of membership and at least 65 years of age

- Bruce Inouye
- Alan S. Dillon

**Gold Water Drop Award**

50 cumulative years of membership

- Delwin Ching

---

New AWWA Hawaii Section Members

Please welcome the following new members that joined the Hawaii Section in the fourth quarter of 2018:

- Brian Bearden
- Chris Budasi
- Benjamin Calimpong
- Christine Camat
- Jason Chillingworth
- Michael Crutchfield
- Jan Mulvey
- Daniel Perry

- John Quintanilla
- Gary Shiroyama
- Chung Yin (Amanda) So
- Matt Stimpson
- Ashley Sudo
- Keala Walau
- Romeo Yanos
- Steven Yap
Newsletter Advertising

The Hawaii Section of the American Water Works Association (AWWA) is currently seeking advertisers for its quarterly newsletter. Advertising provides a direct message to a population of over 600 members statewide who are in need of the products or services being advertised. Although we have switched to electronic distribution of the newsletter, we feel that there is still equal benefit to advertising in the electronic newsletter as with the printed newsletter. In addition, advertising in the electronic newsletter can be in full color.

Please be aware that advertising in the newsletter is available only to businesses related to the drinking water field. Please also note that all advertisements will be submitted for review and approval by the AWWA Hawaii Section Board of Trustees for ad content.
