This past June, over 12,000 people gathered in Denver, Colorado, the location of the AWWA’s Headquarters Office, to attend AWWA’s premiere event: the Annual Conference and Exposition (ACE). Attendees had incredible opportunities to network, learn, and cheer with over 20 networking events, over 850 presenters, almost 500 vendors occupying over 1,000 booths, and over 100 entrants in exciting AWWA competitions. As usual, the atmosphere was filled with excitement and anticipation; every water professional or anyone involved in the drinking water industry should experience ACE at least once.

The conference activities started with all-day pre-conference workshops on Sunday June 9th, and continued with the Opening General Session, technical sessions, and exhibitors from Monday through Wednesday.

There were over 80 ACE attendees from the Hawaii Section and we started off the Denver festivities with a General Membership Meeting and cocktail reception event on Sunday June 9th. It was at Pizza Republica and was well attended with over 80 members and guests mingling, reconnecting and socializing in a relaxed setting before the official start of the conference. Some members took an opportunity to test out Lime scooters; thanks to them for providing some entertainment that night. The evening reception tradition started at ACE2015 and replaced the breakfast event on the first day. This was to allow more time for Hawaii Section members to make their way to and enjoy the opening general session.

It was a success as on Monday morning, a good number of bright eyed and bushy tailed Hawaii Section members...
members made their way to the opening general session, which officially kicked off the conference. At the session, our members witnessed inspirational and invigorating presentations by AWWA CEO David LaFrance and out-going AWWA President David Rager. David LaFrance is an excellent speaker and presenter and this year he used Siri to help him with his presentation.

Immediately following the general session, a number of our Section volunteers walked the exhibit hall looking for vendors that participated in the Pacific Water Conference (PWC). We gave them some Hawaiian Host chocolates as a gesture of Aloha and to encourage them to come back to the PWC in 2020. Many thanks to Rich Hopkins for leading the group through the exhibit hall.

The Technical sessions started later that afternoon, while preliminary rounds for the AWWA’s four competitions: Hydrant Hysteria, Pipe Tapping, Meter Madness and Top Ops, started after the general opening session. There was one team representing Hawaii in the Pipe Tapping competition and they were from the Honolulu Board of Water Supply. They participated in the first day of the preliminaries and were in the running to qualify for the finals after the day. However there were a few faster times in the second preliminary day ending their competition just short of the finals. They were a proud representation of the State, Section and their organization; big congratulations to Evan Kaneshiro, Chad Kamalani-Coleman, Chris Morris, and Coach Ben Meria! The pipe tapping competition is the most exciting event at ACE. If you’ve never witnessed a pipe tapping competition, come check out the Honolulu BWS pipe tapping team in action

continued on page 3
Section’s competition at the Pacific Water Conference in February.

Also proudly representing the Section and State were two recipients of some prestigious awards. On the opening day, there was a luncheon to recognize this year’s Kenneth J. Miller awardees. This year, Hawaii Section’s very own **Paul “Scotty” Scott** was presented this award. The award honors outstanding volunteer service to Water for People’s humanitarian effort; big congratulations to Scotty! There was also a former Section member, **Alyssa “Sunshine” Smith**, that received the award, big congratulations to Alyssa!

On Wednesday there was a breakfast to recognize this year’s Fuller awardees. This year a past Section Chair, **Joanna Seto**, was presented the award. The George W. Fuller award recognizes a member’s distinguished service to the water supply field in commemoration of sound engineering skill, diplomatic talent, and constructive leadership; big congratulations to Joanna!

Thanks goes out to all those that hosted social events for the Hawaii Section members. There were a number of them, which allowed members to get re-acquainted, bond, and have some fun. The events also gave the members opportunities to experience more of what the city of Denver has to offer.

ACE20 is in Orlando, Florida; it’s a long trip, but it will be well worth it. Hope to see most of you in the Sunshine State next year! §
Aloha Kakou,

Time is sure flying by; it seems like yesterday that I was the Vice Chair and the next thing you know, I’m the chair. I am excited to be serving as the AWWA Hawaii Section Chair this coming term with our Executive Board: Director – Daryl Hiromoto, Past-Chair – Mark Ohigashi, and Treasurer – Juanita Colon. Currently, there are a few vacancies on the Executive Board but with all the Trustee and Committee Chair positions filled with hard working, motivated people the Section is well prepared to move forward with meeting the goals set forth in the Strategic Plan.

A big mahalo to the Trustees and Committee Chairs for attending the Strategic Planning Meeting in April before the start of the current Board’s term. A lively discussion took place at the Japanese Cultural Center with one topic being succession in the organization and the need to “tap people on the shoulder.” With the hustle and bustle of everyday life, it is hard to commit to a volunteer role, even in the largest organization of water professionals in the world. Sometimes it takes a tap on the shoulder to get someone’s attention to consider a volunteer role.

Hawaii Section Mission Statement

The Hawaii Section AWWA is dedicated to the promotion of public health and welfare in the provision of drinking water of unquestionable quality and sufficient quantity. The Hawaii Section AWWA must be proactive and effective in advancing the technology, science, management, and government policies relative to the stewardship of water.

Hawaii Section Vision Statement

Hawaii Section of the American Water Works Association will be the leading force in the State of Hawaii dedicated to safe drinking water.
Director’s Message
By Daryl Hiromoto
Hawaii Section Director

One of the more interesting sessions presented at our last Board Meeting in Denver, CO, was the “Ad Hoc Committee to Review and Provide Guidance on Section 3.03 of the By-Laws. To review whether additional Section appointed Directors should be added to the AWWA Board of Directors. If additional Directors are required, what specific criteria should be used, such as membership or other major thresholds, to determine when a Section is eligible for a second Director.” Currently, the Cal-Nevada Section, with a membership count of 5,716, and Texas with 4,118, are afforded two Directors. The three next largest Sections are Florida with 2,683 members, Pacific Northwest with 2,528, and Rocky Mountain Section with 2,471, have but one Director. By comparison, the Hawaii Section has 448 members. Should the larger Sections be afforded another Director?

Before another board member can be added, the Ad Hoc committee will review three perspectives:
1. Impact and value to a Section afforded by a second Director
2. Impact and value to the Association afforded if a Section has multiple Directors
3. If a Director is added, what is the appropriate threshold

Would an already large Board of Directors benefit from an even larger Board? What value will this bring to the Sections and the Association?

At this meeting no thoughts or discussions were shared by the Board but the Ad Hoc Committee will be reaching out to the Board of Directors for input. A Committee recommendation will be coming at the next Winter Board Meeting in January, 2020.

This will not have much of an impact on the Hawaii Section, but sitting with the Board of Directors, I can see both sides of the argument. I’m anxious to see how it all works out and will let all of you know. §
Northwest Pipe Company is the largest manufacturer of fully-engineered steel pipe in the United States for water and waste water conveyance. Our national prominence is based on quality, service, and manufacturing to meet performance expectations in all categories including highly-corrosive environments. With a regional sales staff who understand local conditions and regulations, we provide support and prompt delivery to even the most remote job sites. Following our firm-wide values of accountability, commitment, teamwork, and safety, we commit to providing the highest quality pipe in North America.

**Engineered Steel Pipe** - Proven performance, versatility, and durability in water transmission.

**Cement Mortar Lining** - Internal corrosion protection with added stiffness for deflection resistance.

**Polyurethane Coating** - Thin, strong, and long-lived coating to protect for the life of a pipeline.

**Permalok® Steel Casing Pipe** - Trenchless technology casing eliminates field butt-welding and installation time.
As summer comes to an end, the HI-AWWA/HWEA Young Professionals hope you’ve been keeping cool and hydrated! It’s still hot out, and we want everyone to start the school year happy and healthy!

YPs have been working diligently the past few months and exploring new opportunities for our members, both water-industry specific and non-specific. The 2019 Public Works Conference, attended by YP as well as members from HI-AWWA and HWEA, covered many topics including Kauai and Oahu’s implementation of the Complete Streets Program, an overview of the US Army Corp. of Engineers programs aimed at supporting local government projects, the City and County of Honolulu’s GIS Lokahi Infrastructure Database System, and TOD’s efforts to address climate change. Attended by over sixty professionals of various public and private sector disciplines from Oahu and the neighbor islands, the Public Works Conference was an opportunity to branch out from the typical water-industry tracks and gain a better understanding of the role we all play in a brighter future for Hawaii.

More recently, YPs participated in a Saturday volunteer clean-up project at Ho’okua’aina, a non-profit organization cultivating kalo using Hawaiian traditions on a 25+ lo‘i parcel hidden within Maunawili Valley. As part of the experience, YPs were taught about lokahi, or the state of peace and balance, and how Hawaiians recognized three interconnecting relationships, akua (spiritual), kanaka (fellow humans), and aina/kai (land/ocean), all of which play a vital role to a strong community. Following introductions, YPs got knee deep in work (literally) weeding the kalo patches. This was some YPs first time at a lo‘i, but regardless of experience level, everyone had a blast! There were many helping hands and the task was completed in no time, after which the YPs

continued on page 8
The first event of this term was the AWWA Annual Conference and Exposition (ACE) in Denver, Colorado (see related article on Page 1). As always, the conference was the AWWA’s premiere event with a very large number of vendors, an impressive technical program, and top-notch competitions. Next year’s ACE will be in Orlando so you should be starting to plan soon for that long trip to Florida.

The Regional Meeting of Section Officers (RMSO) this year will be in Tucson, Arizona from October 31st through November 2nd. AWWA Region IV has excellent Section Services staff and the RMSO provides an excellent opportunity for our Section Board members to meet and network with them. They provide valuable insight and guidance to our Section’s Board of Trustees. A recap of the event will be in the Fall Newsletter.

The Pacific Water Conference is the Section’s premiere event and the last conference saw one of the highest attendance numbers in recent years. Conference Chair, Jessica Agsalda, is working hard along with the Pacific Water Conference Committees to put on another successful event. Information will be sent out as plans take shape or visit the website pacificwaterconference.com for the latest news.

Finally, a big mahalo goes out to all volunteers on the Board of Trustees and the Committee chairs; they freely give their time and are committed to the Section’s mission and goals. We are continuously looking for people that want to get involved. If you’re interested or even just curious, don’t hesitate to tap one of the current volunteers on the shoulder.

YP Update, continued from page 7

were able to admire the beautiful lo‘i and enjoy friendly networking over lunch. A big mahalo to Brittany Cody of Hart Crowser for getting the YPs in contact with Ho’okua‘aina.

YP hosted a Summer BBQ at Magic Island on Saturday, August 24th. We invited all HI-AWWA members, the young and young at heart, to come and join us for a day of food, relaxation, and networking! YP also hopes to gather a group for the City and County of Honolulu’s Tour de Trash, a free-to-the-public event showcasing the City’s recycling and waste processing efforts. Lastly, YP is looking to participate in upcoming college career and environmental fairs and promote the water-industry to the younger generation. If you know of any such events, please contact YP at hawaiiwater.yp@gmail.com and we will make our best efforts to attend. There will be many more volunteer, social, outreach, and educational events in the future so keep an eye out for our e-blast newsletters and hope to see you at our next YP event!
Water for People Update
By Adrienne Fung
Water for People Committee Chair

Welcome New Committee Members!
The Water For People Committee has some new faces! Please welcome Greg Arakaki, Jennifer Nikaido, Kevin Baughman, Kraig Otani, Lelemia Irvine, Mike Tallering, and Tony Jones. They have great energy and enthusiasm and are currently hard at work planning Water For People events. We have a pau hana coming up soon on September 12th and other fun events later in the year. Look out for details at https://hiawwa.org/upcoming-events.

Thank you, BWS!
On August 3, 2019, the Honolulu Board of Water Supply (BWS) held their 31st Annual Halawa Xeriscape Garden Open House and Unthirsty Plant Sale. The event featured a wide variety of less-thirsty and native plants, xeriscape and water conservation workshops, keiki activities, educational booths, a cactus display, delicious food, and much more.

The event food booth proceeds went to Water For People, and a big mahalo to all the patrons and volunteers for helping to raise over $500! Thank you to the AWWA-HI volunteers, including Lorna Heller and Thomas Otaguro, Jr. (Co-Chairs), Dean Nakano (important griller for the day!), and James Kim (invaluable volunteer!). Thank you also to the many BWS employees, past BWS employees, as well as BWS retirees for helping to coordinate the food booth.

Congratulations, Scotty!
The Kenneth J. Miller Founders’ Award honors outstanding volunteer service, and we are elated to announce that Paul “Scotty” Scott was selected as an awardee this year! This award recognized Scotty for dedicating time out of his already-busy schedule to help bring an end to the global water crisis. A prime example is his important role in the project for installing solar water pasteurization systems for Palau schools to have clean and safe drinking water.

The American Water Works Association Hawai‘i Section and the Hawai‘i Water Environment Association are proud to announce the seventh annual joint conference, now known as the Pacific Water Conference, at the Hawai‘i Convention Center from February 4-6, 2020. Our joint conference committee is hard at work to bring you an exciting, fun, and educational conference.

The Pre-Conference Workshop kicks things off on Tuesday, February 4. The Conference officially opens on Wednesday, February 5 and lasts through Thursday, February 6. Join us in the Convention Center Exhibit Hall to cheer on this year’s operator competitions featuring HWEA’s Operations Challenge and AWWA’s Pipe Tapping and Top Ops events. Remember to check out the exhibitors showcasing the newest and latest products in the industry. With a multitude of technical session tracks to choose from, there’s sure to be one that piques your interest. The conference golf tournament will be held on Friday, February 7 at the Hawaii Prince Golf Course, and the community service event will take place on Saturday, February 8.

The Call for Abstracts has been sent out and is also available on the Pacific Water Conference website (pacificwaterconference.com). If you are interested in presenting at the 2020 Pacific Water Conference, please submit the Call for Abstracts form to pwc.technical@gmail.com. The deadline for submissions is September 30, 2019.

If you have any questions, please feel free to contact the 2020 Pacific Water Conference Chairs, Jessica Agsalda, Ken Kawahara and Amanda Tanaka, at pacificwatercon@gmail.com.
Newsletter Advertising

The Hawaii Section of the American Water Works Association (AWWA) is currently seeking advertisers for its quarterly newsletter. Advertising provides a direct message to a population of over 600 members statewide who are in need of the products or services being advertised. Although we have switched to electronic distribution of the newsletter, we feel that there is still equal benefit to advertising in the electronic newsletter as with the printed newsletter. In addition, advertising in the electronic newsletter can be in full color.

Please be aware that advertising in the newsletter is available only to businesses related to the drinking water field. Please also note that all advertisements will be submitted for review and approval by the AWWA Hawaii Section Board of Trustees for ad content.

The One AWWA Operator Scholarship is funded through the support of AWWA’s The Water Equation Campaign and the AWWA Hawaii Section.

**Purpose of Award:**

AWWA’s The Water Equation Campaign and the AWWA Hawaii Section will award the One AWWA Operator Scholarship in the amount of $1,000 for Water Operator training and education.

Scholarship award can be used for certification/licensure, two-year water related associate degree, technical school program, professional training program, books and manuals, and operator related conferences.

Each scholarship recipient will receive a one-year AWWA Operator membership.

**Eligibility/Guidelines:**

- Applicant must be a current water operator or seeking to enter the water operator profession
- Applicant must be pursuing an Operator’s License or Certification, two or four-year degree related to the water operator profession, or professional development
- Disbursement of the funds will be made directly by the Section to the financial office of recipient’s college, university, or technical school
- Items related to books, manuals, conferences, professional development courses, and other eligible expenses will be reimbursed to recipient upon presentation of eligible receipts
- Applicant must reside or work within the geographical boundaries covered by the sponsoring Section
- Acceptance of scholarship constitutes permission to use recipient’s name and scholarship story for purpose of promotion

**Application Process:**

All applications will be reviewed by the AWWA Hawaii Section Executive Committee for completeness and merit. A maximum of two applicants will be chosen for a $1,000 scholarship.

Please send your application to:

Jeff Pearson

c/o Operator Scholarship

19 Uahaa Place

Wailuku, Hawaii 96793

Or email to: jeff.pearson@co.maui.hi.us

Please see the form on the following page or visit the [AWWA Hawaii Section Scholarship Page](#) to download the PDF form.
The One AWWA Operator Scholarship APPLICATION

APPLICANT INFORMATION
Name: ____________________________
Address: ____________________________
Phone: ____________________________ Email: ____________________________

EMPLOYMENT INFORMATION
Employer: ____________________________
Address: ____________________________
Phone: ____________________________ Current Position: ____________________________
Number of Years at Job: ____________________________ Operator Level: ____________________________
Member of AWWA: ☐ Yes ☐ No
Veteran: ☐ Yes ☐ No

HOW YOU WILL USE THE SCHOLARSHIP FUNDS
☐ 2- or 4-year Water Operator Related Degree ☐ Technical School
☐ Professional Development Program or Conference ☐ Operator Certification or Licensure
☐ Books and Manuals

ATTACH THE FOLLOWING TO THIS APPLICATION FORM:

• One page essay of career objectives and how this scholarship will enhance your ability for professional development and bring value to the water industry.

• Résumé

• Two letters of recommendation/reference

CERTIFICATION
I certify that the information included in this application is true and complete to the best of my knowledge and I grant permission to AWWA’s The Water Equation Campaign and sponsoring Section to release my name and award for promotional use.

Signature: ____________________________ Date: ____________________________
New AWWA Hawaii Section Members

Please welcome the following new members that joined the Hawaii Section in the second quarter of 2019:
