contact: the01experience@gmail.com

San Francisco's multi genre **01EXPERIENCE** has self released their debut EP "*The Code*".

The Code is a concept album based on the inner science of alchemy and is linked to a larger platform that includes multimedia theatre, art and transformational ritual.

The 01EXPERIENCE features former members of metal bands **Vile** (Colin Davis), **Death Under Fire** (Melissa Mari) and **Orchid** (Carter Kennedy), as well as electronic music producer **EO**.

The band's shadow tinted sound is diverse, incorporating different forms of rock, metal and classical influences. Song structures are catchy but unconventional and dynamic. Front woman **Melissa Mari** acts as the central star of energy around which the music orbits. Fans of Opeth and The Gathering may find resonance with their sound.

Hear the album, watch videos and find out more at <http://01experience.com>
