Design Your Own Whale Tail

As we learned, Humpback Whales have unique flukes that help us tell them apart. We all have things that make us, us. Use the whale tail below to make your own whale fingerprint. Design a whale tail that tells us who you are. You can use words and pictures! You can cut the tail out and use it as a stencil or you can do the project right on the paper. Share your tail with us via email at jmorgan@opakedu.org or on our Facebook Page (@OPAKedu)!
