

2010-2011 High School Graduation Rates: Latino State of California

Percentage of Latino student cohort earning a high school degree

The state average is 70.4%.

The four-year graduation rate is calculated by dividing the number of students in the 4-year adjusted cohort who graduate in four years or less with either a traditional high school diploma, an adult education high school diploma, or have passed the California High School Proficiency Exam (CHSPE) by the number of students who form the adjusted cohort for that graduating class.
