

2010-2011 High School Graduation Rates: State of California

The state average is 75.3%.

Percentage of general student cohort earning a high school degree

The four-year graduation rate is calculated by dividing the number of students in the 4-year adjusted cohort who graduate in four years or less with either a traditional high school diploma, an adult education high school diploma, or have passed the California High School Proficiency Exam (CHSPE) by the number of students who form the adjusted cohort for that graduating class.
