Subject: Nogales interconnection Project

Your Comment: USA-Mexico trade is very positive for both countries, be it produce, electrical power or any form of manufacturing.

Nogales Interconnection project will bring needed capacity and reliability of electrical power to meet the growth needs of the city of Nogales-Rio Rico Industries.

Our only concern will be the fairness of negotiation regarding the fair market value of Right of Way acquisition for this project.

Beyond that the scope of this project is something we are very much in favor of.
