

# HOMEMADE BUBBLES #1

## Materials

### Recipe 1

- 4 1/2 cups water
- 1/2 cup dishwashing detergent
- 4 Tablespoons glycerine  
*(available at pharmacies)*

## DIRECTIONS

**In this bubble recipe, both the glycerine and detergent contain beef by-products. Beef by-products enable us to use 99 percent of every beef animal.**

1. Measure the ingredients into a container.
2. GENTLY stir. If foam forms, gently skim it off.

It is recommended that you let the mixture sit awhile before using. The longer you let the mix sit, the bigger the bubbles will be and the longer they will last.

To make bubble wands, use your imagination. Make big circles by using wire clothes hangers. Cut off both ends of various size cans and use as wands (small children will need help with this). Shape pipe cleaners into circles. Use anything round that you can blow air through.
