Street Striping Equipment

Fire Department
Completed the FAA 139 Inspection
October is fire prevention month, and this year’s message is all about smoke detectors. Did you know that smoke detectors go bad? They do, and they should be replaced at least every ten years. Your existing smoke detectors will have labels on them which show the year they were manufactured, so please check them and replace any that are over ten years old. Batteries should be replaced at least once a year and any time that they begin to chirp. Smoke alarms should be located at least 10 feet from your oven or stove and at least 3 feet from rooms with a shower or bathtub to prevent false alarms. False alarms can become a nuisance and that often leads to battery removal. Your smoke detectors should also be tested monthly by simply pressing the button. We set off the emergency sirens on the first of each
month, and that may be a good reminder to check your detectors. Smoke detectors should be placed inside, or just outside every bedroom and on every level of your house. If you have any questions about smoke detector placement or function, please call the Ruidoso Fire Department at 575-257-FIRE.

**Human Resources**

Solid Waste
  - Bears are out. It takes time to clean up bear messes efficiently, but they will be cleaned up.
  - Pine needles are falling, causing a lot of grapple work.

Street Department
- Working on drainage on the Grindstone Map project
- Set out barricades for Mid-Town Halloween
- Making cold mix for Map Project
- Filling potholes
- Installing signs that have been knocked down
