Public Meeting Set to Discuss Ruidoso Sewer Line Hazard Mitigation and Stabilization Phase

RUIDOSO, NM – December 29, 2021 – A public meeting is scheduled for January 19, 2022, at 6:00 PM to discuss the Ruidoso Sewer Line Hazard Mitigation and Stabilization Phase. The meeting will be held at Village Hall located at 313 Cree Meadows Drive. A Zoom link is also available for anyone who wishes to attend virtually.

ZOOM Link:
https://us06web.zoom.us/j/81272808447?pwd=TFdqT016UDhsTjFMUFphbExvblJ4QT09

The purpose of this meeting is to inform the public of the upcoming Hazard Mitigation and Stabilization Phase of the Ruidoso Sewer Line Project that will be constructed at 39 locations along the Rio Ruidoso from the Upper Canyon to the Regional Wastewater Treatment Plant.

The meeting will include the following:

- A presentation by the engineer of the project, Molzen Corbin, highlighting the nature of construction that can be expected at the various locations
- Discussion of tree and landscaping replacements, excavations, and construction
- Information from the Village of Ruidoso and High Water Mark regarding what to expect for easements, access to project locations, and environmental compliance requirements
- Visual aids will be presented to better help the public understand what should be expected with these projects when it comes the removal of trees and why it will be necessary to remove some trees and not others.
- An arborist will be in attendance to answer questions and elaborate on the processes and reasoning for the tree removals and other project-related questions.

Construction is anticipated to start in Summer 2022.

The Village will continue to update the project website (RuidosoSewerProject.com) and will continue to reach out to property owners to notify them if other public meetings are held prior to construction. If you have any questions, please contact Zeke Greer at 575-430-9990.
