

The only dual headed spray wand

Spraydex products

All of our products are made with high quality 6061-T6 Aluminum and made in the USA. All wands have 'G' threads compatible with attaching to a Graco or Titan gun and extension poles.

<Specifications for the original and Angle head models>

Designed for 6 series Tip sizes (12" Fan) Produces 20" to 24" fan width depending on pump pressure and tip orifice.

615 tips can be used with a ½ GPM pump, eg Titan 440. A Larger pump is required with increase of tip orifice.

The '**Original**' dual headed spray wand with a 13" extension pole. Part # **SDX16-1300** (This is the most common part purchased) Specifically designed for cutting your spray time in half.

Why we made this? Perfect for spraying residential or commercial walls and ceilings up to 9 feet high.

The '**Angled**' dual headed spray wand with a 4" extension pole. Part # **ANG16-0400** Specifically designed with a 24 degree angle to replace the use of an 'angled head adapter' on your 4' to 6' extension pole.

Why we made this? For spraying high walls such as tilt ups. Same spray width as the original.

The "**4 inch adapter**"

Part # **EXT-0400**

Why we made this? For reducing the extension length - For more control while spraying off extension ladders or tight areas.

The "**Extra wide**" dual headed spray wand with 13" extension pole.

Part # **EXW16-1300**

Specifically designed for 8 series Tips. (16" fan) (Produces 26" to 30" fan width depending on pump pressure and Tip orifice; Pump size; minimum 1 GPM. (Gallon per minute)

Why we made this? It is the largest spray pattern on the market today, designed for major production.

The "**Pipe Sprayer**" dual headed spray wand with 13" extension pole. (Custom Order)

Part # **PIP16-1300**

Specifically designed for Spraying both sides of pipes.

Why we made this? Excellent for underground parking structure pipes.

'Angle head' attached to a 6' extension pole

Original 13 inch wand
