

Friday, August 11, 2017

Hello,

I am looking forward to seeing all of you in a couple of weeks! I am truly excited for this upcoming school year. We have wonderful new faculty and staff members. We have fabulous veteran faculty and staff. We have new ideas, new energy, and a new set of opportunities to positively impact the lives of our students. If we combine all of that together, we have a recipe for a very successful year.

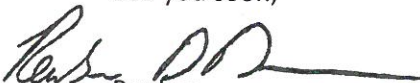

As you walk into your buildings this fall, you will notice a few physical upgrades. All classrooms have been equipped with new dimmable lighting. Each school has new HVAC systems and controls for better air quality and temperature control. Improvements have been made to the CHS art room as well as to the ATC building. Warren has done a few upgrades to our technology infrastructure and has also been busily purchasing over 600 new ChromeBooks.

This year, we plan to develop and communicate a strategic design, including a new mission/purpose and vision for our school district. In turn, this will enable us to develop a clear strategic plan for our district. Though we have more work to do in this area and more feedback to gain in order to accomplish this, we as a district will continue our work toward achieving our four goals:

1. To create a learning community that inspires every student through active and personalized learning.
2. To strengthen and build learning partnerships through effective communication and collaboration.
3. To provide a healthy, safe, and secure environment that supports learning.
4. To achieve educational objectives through effective planning and management of resources.

2017-18 is shaping up to be great!

See you soon,

  
Reuben
