

Lubrecht Experimental Forest Ski Trails

This ski facility is made possible by a collaboration between the Missoula Nordic Ski Club and the Montana Forest & Conservation Experiment Station (MFCES). MFCES is the research arm of the University of Montana's W.A. Franke College of Forestry & Conservation, and Lubrecht Experimental Forest is its flagship field station. Lubrecht Forest trail grooming is performed by the Missoula Nordic Ski Club (missoulanordic.org) and is made possible by club memberships and donations.
