Dear Members of the U.S. House of Representatives:

As members of the American design and construction industry, we are dedicated to tackling the challenging issues that threaten our planet by creating healthy, productive, and safe communities for all, today and in the future. We are on the front lines addressing climate change in a meaningful and impactful way, facing current issues such as energy efficiency, water conservation, sustainable land use, resiliency, and adaptive reuse. More can be and must be done. **We strongly support the bipartisan Climate Solutions Caucus and thank the following 52 representatives for their courage in working across party lines to find solutions to this urgent real-world challenge:**

Sincerely,
