The Governor's most recent budget proposal slashes \$100 million from afterschool. This 15% cut would come on top of the 62% cost increases of the last few years, which will combine to cause at least 62,563 students to lose afterschool throughout the state.

The Assembly and State Senate are united in their opposition to these cuts, but they need to continue hearing from YOU as they finalize budget negotiations with the Governor. We only have a few days to protect the students and families already hit hardest by this devastating crisis, so please take action today.
