

I have been privileged to be both the Director of Communication and Executive Director of Media for two 501(c)3 ministries having a global reach.

In this capacity I traveled much to foreign and “developing” countries. Included in my travels was a 10 week 10 country tour throughout Africa and Asia. In countries such as Liberia, India, Indonesia, China, Egypt, South Africa, Ghana, etc., I traveled to some of their most remote and under developed regions having the most need.

We were informed that we may be exposed to public health risks and to use caution. With this information I packed Biocence and used it on my hands, face and body frequently including their nasal spray.

I was astonished at the positive results from faithfully using Biocence. It protected me like an invisible shield! It became my personal security guard.

“game

changer”

toxic situations. There is no way I will travel without Biocence along with keeping it in my car and home as well.

Becoming so confident in my personal protection plan, I almost went into apoplectic shock when an airport customs officer confiscated my bottle of Biocence. I happened to carry a bottle containing slightly more than 4 ounces. Lesson learned. Fortunately it was on my way back to the States. Mission completed with amazing results.

“Don’t leave home without it” is now for my Biosence not my credit cards.

Very Sincerely and Appreciative

Steven A. Appel
