

Cody Outdoor Classroom

Where Learning Comes Naturally

Job Title: STEM Instructor

Position Type: Fall, Seasonal

Salary: \$90.00 - \$100.00 daily (Room & Board Provided)

Reports to: Program Manager

Employment Dates: September – November 2018

Position Purpose

The STEM Instructor implements all aspects of the Cody Outdoor Classroom curriculum, including standards-aligned lessons, team building, and large group discussions to 4th – 8th grade students participating in our residential program.

About Us www.codyoutdoorclassroom.com

Cody Outdoor Classroom provides opportunities for students throughout New England to explore environmental and STEM education through inquiry-based lessons both in the classroom and at our superb campus at Camp Cody in Freedom, NH. Cody is located on the southeastern edge of the White Mountains – where New England’s natural beauty is seen at its best – inspiring forests, breathtaking mountains, and crystal-clear lakes. Complimenting this is our modern facility, which offers program resources that include indoor science classrooms, a ropes course, and a spacious dining room.

Job Responsibilities

Instructors deliver residential, 1-5-day STEM and environmental educational programs to 4th - 8th grades from New England schools. All of our lessons are standards aligned and each program is customized to support student learning in the classroom. The hands-on lessons focus on building critical thinking skills, exploring connections among the natural and manmade world, and understanding the role of science and engineering in careers. Instructors also facilitate team building curriculum (initiatives and low ropes) to develop students’ leadership and problem-solving skills.

Instructors are responsible for educating a group of 12-15 students throughout the program, including facilitating day and night lessons and large group activities and leading meals. All instructors participate regularly in tasks that support our programs including: housekeeping, kitchen, office work, debriefs, and trainings. Instructors are supervised and trained by the Program Manager and have opportunities to enhance our curriculum and develop their educator portfolio.

We are committed to providing the highest quality education experience to our schools and are looking for enthusiastic, dedicated educators to join our team!

Join a staff that is committed to providing an unforgettable experience to youth. Please send resume and cover letter to outdoorclassroomjobs@gmail.com. In the subject line, please write “STEM Instructor” and your initials. Application deadline: June 15, 2018.

9 Cody Rd. Freedom, NH 03836 (603) 539 4997 info@codyoutdoorclassroom.com
