DailyBreath, LLC is a cloud based SAAS company delivering personalized environmental insights for better asthma outcomes.

DailyBreath is an asthma wellness platform for self-empowered asthma care available in the App Store or via Google Play.

DailyBreath

What does it do? Uniquely tracks symptoms and pinpoints relevant triggers (allergens, pollutants, and the weather)

For what purpose? To support asthma management and control.

Why? To reduce potentially preventable asthma attacks. 30,000 asthma attacks (symptoms) in the US daily, 5000 of which lead to ER visits, 1000 of those in hospitals stays, and 10 lost souls every day.
