Special Edition: Focus on AmeriGEO
September 13, 2022 from 11:00AM-12:30PM EDT (GMT-4)
http://www.geohealthcop.org/workshops/2022/9/13/telecon-sep2022

Organized by the Earth Observations for Health (EO4Health) Initiative, GEO Health Community of Practice, and AmeriGEO leadership, the second annual Special Edition: Focus on AmeriGEO aims to highlight an array of research applications that use Earth observations to examine our planet’s complex global challenges. This event will include brief project highlights, followed by an interactive group discussion, which will facilitate knowledge sharing and networking across disciplines, sectors, and geographic regions. The information gathered will inform activities of the WMO/WHO Study Group on Climate Services for Health as well as research funding opportunities, including the Belmont Forum’s Climate, Environment, and Health Collaborative Research Action.

We invite you to present a 4-minute flash talk and share your current research activities using Earth observations for public health applications in the Americas region. If you are interested in sharing your work, please email your 3-sentence description of your proposed talk to Helena Chapman (helena.chapman@nasa.gov) by 5:00PM EDT (GMT-4) on Friday, September 9, 2022. As you prepare your 4-minute flash talk, we request the following 3-slide template: Slide 1 (What is the project objective and rationale?), Slide 2 (What were the key outcomes of your project?), and Slide 3 (How are the findings currently being used, and what are the potential future uses?).

We look forward to receiving your project descriptions!

Sincerely,

Organizing Committee
Earth Observations for Health (EO4Health) Initiative
GEO Health Community of Practice
