

NutriCoreFX nutritional lipids allow food makers to deliver the nutritional value of healthy fats in a dry stable convenient form. Common uses include functional drinks, sports drinks, meal replacers, diet products, and dietary supplements.

Nutritional lipids come in the form of convenient, high stability powdered emulsions.

AMONG THE BENEFITS OF NUTRITIONAL POWDERS:

- Delivers nutritional value of the lipid in applications where the convenience of powders is key
- Nutritional value includes metabolism, cognitive improvement, digestion/gut tolerance/ bioavailability
- Enhanced flavor/texture/creaminess
- Improved appearance (especially opacity and viscosity)
- Better control of delivery and release of fat and other components
- Adds stability to finished product
- Easy to incorporate into food and beverage systems
