YOUR FREE GIFT THIS QUARTER

When you started out as a parent, chances are you felt completely unprepared to deal with the challenges of a child. But at some point in your journey, you've probably found yourself feeling confident in your parenting role and abilities. The routine and predictability of your child's life became manageable and fairly easy to navigate. Now that your child is a teenager (or soon-to-be a teen), you may be feeling overwhelmed at times with fear, confusion, frustration, and a lack of understanding. It almost feels like you're starting all over with a

screaming, needy, and sometimes whiny child (only much taller and with more attitude!).

The changes of adolescence, while normal for every teen, feel completely abnormal to parents of teenagers, often leaving you feeling like a helpless bystander. But you're not alone and there is hope to help you (and your teen) get through these challenging, changing years. GET YOUR FREE COPY TODAY!
