

COVID PROTOCOL

February 15, 2022

Brava has adopted a set of safety protocols to protect audiences, performers, staff members, and volunteers during live, indoor performances in accordance with applicable health orders and guidelines.

These protocols are:

- Proof of full vaccination is required for all in-person ticket holders.
- **Starting March 1, 2022 booster shots are required for all eligible in-person ticket holders.** Patrons attending performances prior to March 1 are strongly encouraged to get a booster shot as soon as they are eligible.
- If a patron is eligible for a booster, but has not received one, we will accept a negative COVID-19 test, taken within 24 hours (for antigen tests) or 48 hours (for PCR tests). All COVID-19 tests must be verified by a third-party. All patrons must be fully vaccinated and negative test is only accepted in lieu of proof of booster for eligible patrons.
- All ticket holders entering the theater will be required to show an ID with photo and full name and proof of vaccination and booster shot when applicable. A physical vaccination card, picture of your vaccination card, or digital vaccination record will suffice. California residents may obtain a digital vaccination card at [cdph.ca.gov](https://www.cdph.ca.gov). Brava will not store this data; the patron is only required to present the documentation for inspection.
- Proof of vaccination must indicate that it has been at least 14 days since the patron's last vaccination dose (two doses are required for the Pfizer and Moderna vaccines, one for the Johnson & Johnson vaccine). Proof of booster shot must indicate that it has been at least 7 days since the patron received a booster shot.
- All ticket holders are required to wear face masks inside the venue at all times except when actively eating and drinking in designated areas.
