TURNITIN: SYNCING THE CLASS ROSTER

Enrolled students will appear in the assignment inbox once they have accessed a Turnitin assignment in the course. To automatically import the student list into the inbox before students access the assignments or submit papers, an instructor can synchronize the assignment roster, which will import a list of all students currently enrolled in the course for the assignment. This function can also be used later to remove student users who are no longer a part of the course. All submissions and data for students removed by a Roster Sync will disappear from all Turnitin assignments in the course.

Instructions

1. Under Course Tools, select Turnitin Assignments.

2. Click on the assignment you want to sync.
