

Seasonal Employment Opportunities - mid-August to mid-November

Mill 95 is Idaho's first hops pelletizing operation. We work with every part of the hops chain including buying from farmers, processing, storing and selling to brewers. Quality and integrity are our core values and we are excited to start-up our operation in Wilder. We offer on the job training, day-time schedules, stay to the end bonus, and an opportunity for top performers to return for future seasons.

Forklift Operators

Operate a forklift, bale squeeze, or other power equipment to receive, load, unload, move, stack, stage, weigh and log product and materials.

- Operate industrial vehicles to transfer product between receiving, working and warehouse areas
- Unload all bales from bale truck and line in the staging/testing area
- Stack, organize and store product
- Weigh and record product receipt and movement into ERP system via keying and scanning
- Assist with minor maintenance, recommend process improvements to enhance operational efficiency and safety
- Ability to operate equipment, fork lifts and pallet jacks; certification to operate a fork lift is a plus

Production Line Operators

Prepare hops products for production, set up, maintain and operate machinery. Operators may perform Bale Breaker and/or Packaging duties.

- Record product receipt and movement into ERP system via keying and scanning
- Prepare, print and place labels
- Set up machines for production cycle and control and adjust machine settings
- Remove packaging materials and handle waste management
- Load bales onto bale breaker feed conveyor
- Monitor and replenish supplies in the bagger, case erector, labeler and sealer; monitor ink levels for bag printer and labels
- Place bags of finished goods into the cases and perform leak tests to protocol
- Test operation of machines and fix issues that might occur during the shift
- Check output to spot any machine-related mistakes or flaws
- Assist with minor maintenance, recommend process improvements to enhance operational efficiency and safety
- Follow safety procedures and company policies for equipment operation
- Ability to frequently lift and/or move items up to 100 pounds

- Ability to operate industrial equipment
- Understanding of production procedures

Quality Technicians

Assess the condition of hops received ensuring quality standards are met prior to being accepted for production. The Technician will visually inspect and test and measure product for moisture and temperature. May perform Production Line Operator duties.

- Perform quality checks to protocol on all products
- Record weight and quality measures in ERP system via keying
- Perform failure and routine analysis
- Maintain gauges and testers
- Recommend process improvements to enhance operational efficiency and safety
- Follow safety procedures and company policies for equipment operation
- Observant, detail-oriented, and strong oral communication skills

All roles require:

- High School Degree
- 1 year experience in related role and/or industry
- Basic math (add, subtract, multiply, & divide)
- Personal computer, keyboarding, ERP system experience preferred
- Detail-oriented, and strong oral communication skills
- Frequent standing, walking, bending, kneeling, stooping, crouching and reaching
- Ability to grip and hold items and manual dexterity
- Ability to frequently lift and/or move items up to 50 pounds and to lift up to 100 pounds on an infrequent basis, unless otherwise stated above
- Ability to work in and between extreme weather temperatures, both indoors and outdoors
- Ability to work extra hours and week-ends as needed

Hours: 8am - 5pm Monday through Friday

Rate of pay: \$17.50/hour PLUS stay to the end bonus
