Dear Dr. Holdaway,

We have received a reply from Dr. Rawlence. It is appended to the present message. We understand from his letter that he made use of data published in earlier papers and of those from the open abstract of Ms Olivia Johnston's thesis. As such, we do not have any robust element to investigate further. However, we will certainly take into consideration results of the on-going investigations on this issue from your institution and that of Dr. Rawlence.

With my best regards,

Claude Hillaire-Marcel
