How to Use these Guidesheets

These guidesheets are specifically made for practicing Copperplate/Engrossers Script lowercase letters. The slant line is at 55 degrees and the x-height is labeled on the bottom. I've provided both 4/16 inch and 3/16 inch. Tip: Practice on a bigger x-height first. This will enable you to see your mistakes. When you are ready, move onto the smaller x-height.

The general ratio from the x-height to 2nd ascender/descender line is 1:3. Remember to think ‘ovals’ when writing, keep your downstrokes parallel to the slant line, and write slowly! Enjoy!

Let me know if this is helpful for you! I'd love to hear your feedback.
