## INCLEMENT WEATHER POLICY

\*In the event that we would have to delay or cancel a power league event due to the weather it would be communicated the following ways:

1. An email would be sent via AES to all club directors and coaches that have their contact information listed on their team roster.
2. Posted on the Lake Michigan Power League website – [www.lkmichpl.org](http://www.lkmichpl.org)
3. Posted on the MJVBA Facebook page

\*Considering that bad weather and bad roads can be very regionalized in Michigan and Indiana we rarely would cancel the entire power league unless there is a storm that causes dangerous driving conditions for just about everyone. Typically we would first leave it up to each location as to whether or not they can still safely hold the event and second it would be up to each team/club to decide if they want to travel.

\*Please realize that when making these determinations that it is not easy trying to decide what is best for 100 or more teams. We would try to cancel or delay as soon as possible but sometimes that determination isn't made until a few hours before the start of the event.

\*If only a few teams are unable to make it to an event there would not be a make-up date for those teams. If there is a large amount of teams that don't participate then every effort would be made to reschedule the event.
