# Split System Condensing Unit with Air Handlers

## Why Thru-the-Wall?

Thru the wall units are designed to save money and time with simple installation. Units are easily serviced in any weather conditions. No long refrigerant or electrical runs, no ground clutter, no theft or vandalism, and no roof penetration. Thru the wall units also offer the ability for separate electrical meter savings and have a better overall appearance. All of which make them the perfect choice for apartments, townhomes, condominiums, hotel and motel suites, student housing, and senior living facilities.

## Condensing Units 1000, 3000, 4000 and 5000 Series

### Features:

Units are compatible with NCP Air Handlers or certain other air handlers with ECM motors\*

Available in 1.5 to 2.5 ton sizes

Heavy-duty, water resistant cabinet

Easy access control box

Precharged and Prewired

1000, 3000, and 4000 Series

12.0 SEER AHRI Rating

5000 Series

Up to 14.0 SEER AHRI Rating

Brass service valves

Optional Architectural Grilles available

### Cooling System Features:

High efficiency compressor

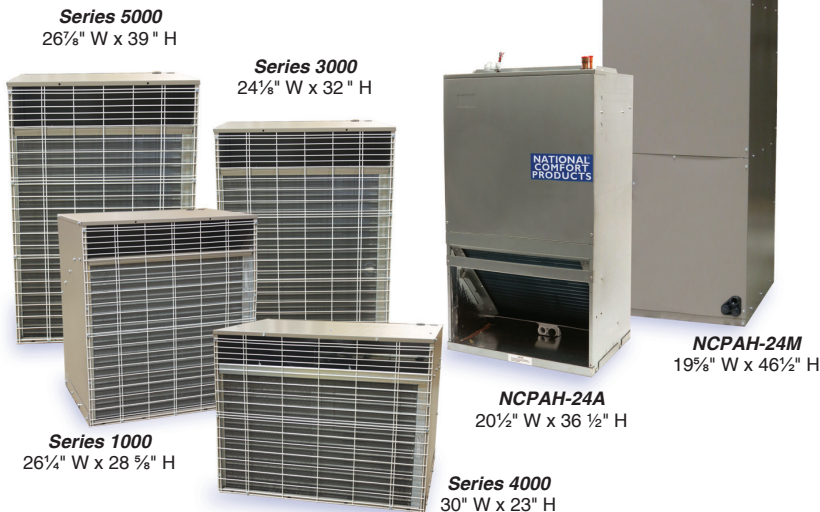

Copper tub with enhanced aluminium fin coils

Permanently lubricated, high efficiency PSC motor (DC Motor, 5000 Series only)

### Air Handlers

Our condensing units are tested to meet maximum efficiency when matched with our air handlers.

\*Please consult the DOE CCMS data base [here](#) for a list of rated combinations of indoor and outdoor units. Combinations of outdoor and indoor units that are not rated will require factory testing and listing with DOE. Please consult the factory.

# Comfort Pack

**CPG & CPE**  
(Gas Model Shown)  
28" W x 43" H

## Why Comfort Pack?

**Comfort Pack** is a SPVU heating and cooling unit designed specifically for the multi-family industry. It is a self-contained heating and cooling thru the wall packaged unit available with gas or electric heat.

## Comfort Pack CPG & CPE Models

### Features:

- Self-contained Heating and Cooling Unit
- Gas (CPG) or Electric (CPE) Heat Models
- 1, 1.5, 2, and 2.5 Ton cooling capacities
- Up to 51,000 BTUH heating capacity output
- Precharged and Prewired
- Polarized molex electrical connections on cooling chassis
- Pre-painted stamped exterior grille
- Optional Architectural Grilles available

### Cooling System Features:

- High efficiency compressor
- Easy access slide-out chassis
- Secondary Drain
- Copper tube with enhanced aluminium fin coils
- PSC condenser motor
- 5 speed DC blower motor

### Heating System Features:

- 80% thermal efficiency industrial quality, serpentine design heat exchanger
- Direct spark ignition with unique, single orifice burner
- Slide-out furnace
- Sequencing Control (electric)
- Diagnostic LEDs visible through furnace door
- Control board mounted out of the way
- Sealed combustion chamber
