

Environmental Policy

Pulse Seismic Inc. (Pulse), is committed to continually improving its impact on the environment by ensuring its employees and contractors conduct their business in a manner that will prevent the pollution, destruction, alteration or contamination of their work environment.

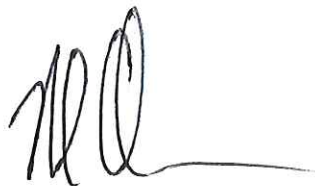

Pulse responsibly manages all aspects of its business in order to comply with recognized environmental standards and legislated requirements and takes all reasonable steps to prevent damage and loss to the environment, equipment, materials and products.

To demonstrate its commitment, Pulse uses the most current seismic technologies in order to ensure low impact ground disturbance. The company performs pre-job scouting to identify areas of concern and management meets with all stakeholders prior to the commencement of any work to address potential impacts.

The company also mitigates the consequences of emergency events through pre-planning and effective response programs in order to ensure any potential environmental damage caused by Pulse operations is rectified in a timely and efficient manner.

The company's environmental policy and ongoing programs are communicated to its employees and contractors to ensure their involvement, support and commitment.

This policy forms the framework for setting and reviewing the company's objectives and targets toward achieving environmental sustainability.
