First Call Energy takes pride in providing timely, efficient, & safety conscious services to Western Canadian customers.

+ NO EXCUSES

We have the expertise & equipment to provide the highest standard of service in our industry. We work closely with a variety of Western Canadian companies involved in areas of industrial construction, commercial construction, utility installations, municipal services, electrical and mechanical and property management. We strive to provide the best possible service in our industry; our success is based on the satisfaction of our clients. We provide a broad range of quality services to efficiently handle projects both big + small, while maintaining our customer's schedule and budget.

Our fleet is managed & operated by industry leaders working in the business with a combined 40 years of service.

“ Hydrovac trucks can be a tremendous cost to projects if not managed well. First Call Energy provides a premium service with industry leading equipment & experienced operators that has set a precedent on all job sites I have managed. There is no company in the industry more competitive and invested in your projects than FCE, thank you.”

TESTIMONIAL from *Brand Energy Solutions*

HOW WE CREATE VALUE

Utilizing our knowledge of the industry & knowing what our clients expect has given us the opportunity to grow our company in various directions & to become a turnkey provider. We provide value in having the most advanced equipment in our field. Our employees have no less than 5 years of experience in their fields. Our price point is below industry standard but we never sacrifice the quality of service or equipment.
