EDUCATION

B.S. Business Administration Cal '05 - '08

I graduated early with a 3.67 GPA and a certificate in Management of Engineering and Innovation from the College of Engineering.

CAPABILITIES

Design Thinking

Hardware + Software UX
iOS, Android & Web OS
Phone, Tablet & Desktop
Extensible Design Systems

Design Tools

Design: Adobe PS/AI/ID & Sketch
Proto: Principle & Pixate
Present: Slides & Keynote

Design Innovation

GP-23515-00-US (6/30/16)
GP-22965-00-US (6/26/16)
+ 10 patents pending

EXPERIENCE

Visual Designer (5) Nest / Alphabet

2/14 to Present

As the longest-tenured designer on a team of 30, I have established myself as a champion of **consistency, efficiency and innovation**. I bring these values to the products we produce both externally (major & minor apps releases) and internally (**design framework & process**). I have found great success in my efforts due to the rapport and friendships I build with my UX, engineering and PM peers. I have shipped over a dozen releases and have played integral roles in each phase of a launch: **concept, design, production & testing**.

Notable Launches: 5.0 Apps (6.19.15), Home/Away Assist (3.10.16)

Designer Nest Labs

7/12 - 2/14

Before the acquisition, I was the **sole designer for the entire suite of app products at Nest**. I worked closely with **Tony Fadell** and a small team of engineers to concept a re-design for our entire mobile applications for **iOS, Android and web**. With the Eng Lead, I integrated **Nest Protect's** complex set of sensors into a fully-functional, **tiered system of alerts** in the new app architecture. I was solely responsible for every step of the design process, from wires to **creating over 20+ vSpecs** and several hundred production assets. In addition to the 4.0 Apps release, I lead a series of design efforts on future-looking projects on energy and directed the entire suite of support videos for Nest Protect.

Notable Launches: 4.0 Apps (8.3.14), Nest Protect (8.3.14)

Art Director / Designer Teak Digital

10/10 - 6/12

I began my career at TEAK as an intern, hungry to learn and grow into a full-time contributor. In short time, I was promoted to Art Director and put in charge of leading projects for companies like **HP, JanSport & Google**. Most notably, I **teamed with the Creative Director at Nest** to concept and produce several 60 second animations, and shoot the entire suite of support videos for the **launch of the Nest Learning Thermostat**.

Notable Launches: 4.0 Apps (8.3.14), Nest Protect (8.3.14)

Creative Mizono Design

10/10 - Present

I used my personal design company to pursue all of my other creative passions. I have shot and edited wedding videos, created iconic sports graphics, as well as performed contract design work for **Square**, Tinfoil Security and **Google-acquired Punchd**.
