|                        | Perform precautionary wipe of all surfaces with approved wipe **maintain wet time as stated by manufacturer**  
|                        | For a List of approved wipes and wet times click [here](#) |

| INSIDE THE ROOM, ONCE ULTRASOUND COMPLETED, AFTER SANITIZING GLOVES WITH GEL, BUT BEFORE REMOVING PPE | Visually inspect the machine for any bodily fluid or tissue  
|                                                                                                          | - If present, remove with wet gauze or bleach wipes  
|                                                                                                          | Using approved wipe, wet all surfaces of the machine including:  
|                                                                                                          | • the cord  
|                                                                                                          | • the keyboard  
|                                                                                                          | • the screen  
|                                                                                                          | • probes and cords  
|                                                                                                          | • the power cord  
|                                                                                                          | • the lid  
|                                                                                                          | • the wells  
|                                                                                                          | • gel bottles  
|                                                                                                          | • wipes containers  
|                                                                                                          | **please remember that there is a “wet time” associated with all wipes, check the manufactures recommendation**  
|                                                                                                          | While still in PPE, move the wet machine out of the room  
|                                                                                                          | **If another person in unavailable to help, use your foot to push the machine out** |

| AFTER EXITING THE ROOM, WHILE WEARING CLEAN PPE | Visually inspect the machine for any bodily fluid or tissue.  
|                                               | If present, remove with wipes  
|                                               | Using an approved wipe, wet all surfaces listed above again  
|                                               | **Dry completely between the 2 required “wets”**  
|                                               | Maintain wet for **required amount of time** before considering the device decontaminated  
|                                               | **Please check the wet times of you approved wipes and don’t forget to wipe the gel bottles and wipes container as well** |
