

## **CE 8930**

### **Group Assignment #3**

---

---

Assigned: Thursday, January 30 2014  
Due: Tuesday, February 6, 2014 (midnight)

Recall the first group project. Write a report that summarizes and criticizes the submission by the three groups (of course, other than your own group). Specifically discuss the (i) feasibility of the practical implementation of the proposed approach, (ii) technical content and thoroughness of the suggested SHM approach. You are also encouraged to comment on the presentation of the report (quality of figures, and clarity of the narrative).

Please note that grades are already assigned to the reports for the first assignment. Your peer-review will not affect the grades for any of the groups. However, you will be graded for the quality, completeness, technical soundness and helpfulness of your peer-review.

The report should be no more than 2-pages (10% of grade will be taken out for each extra page). Please use Times New Roman 11 font with normal margins.
