

Case study

Create a strategic advantage with
workforce connectivity

SAP cloud-based solution

Background

This leading office supply organisation sought to move from an in-house SAP platform to a SAP cloud based solution. At the same time, the payroll services function would be transitioned from an in-house arrangement to an outsourced solution with processing for the 1,600 employees being undertaken from our Malaysian processing centre.

Scope

The solution developed for the organisation was to provide technology that was tier 1 and off-premise. Support for the system would be included in the solution with the aim of achieving significant cost and operational benefits.

rivor was charged with the responsibility for the system design, build and implementation.

Benefits

rivor successfully achieved the transition of service to an outsourced arrangement along with the provision of a cloud based SAP platform. The development and delivery of a new service model has positioned the organisation favourably to accommodate its on-going growth strategies, whilst significant cost reductions have been achieved.
