Sunset Park Solar is New York’s first cooperatively-owned community solar project! The solar array will be built on the Brooklyn Army Terminal rooftop in Sunset Park, Brooklyn. The project will offer 150-200 local households and small businesses monthly energy bill discounts. This groundbreaking project is the first of its kind with UPROSE as project lead, and developed in partnership with Solar One and Co-op Power. The project offers local renewable energy, community cost savings, and an innovative community ownership model that operationalizes a Just Transition in Sunset Park. Sign up today at sunsetparksolar.org!
