SPEC SHEETS & CUT SHEETS
AURA® WATERBORNE INTERIOR PAINT
EGGSHELL FINISH #524

Surface Preparation
Surfaces to be painted must be clean, dry and free of dirt, dust, grease, oil, dust, paint, water soluble materials and any other contaminants. Sand or scrape these areas to a feather edge smooth with adjusted surfaces. Glossy areas should be dull. Chamfered edges must be free of sand dust. Dust with Aura® "Finish Prep" before and after applying oil base, latex, and alkyl paints. Do not mist the painted area.

Note: primer or finishing surfaces must be alcohol based, and alcohol resistant. Panels must be primed. Do not allow them to remain in direct sunlight or direct heat. Do not allow them to be under constant exposure to direct sunlight or direct heat.

Lighting: .0000001 Lux. (0 Lux)

Primer: Aura® "Base Paint"

Paint: Aura® "Finish Prep"

Clear Coat: Aura® "Finish Prep"

Thinning/Cleanup

Conditioning with Benmoore® (c) 2011 Benmoore® may be necessary under certain conditions to adjust spray air or spray characteristics.

Environmental Health & Safety Information

Use only with adequate ventilation and in well-ventilated areas. Ventilation must be provided before and during application. 

Avoid prolonged exposure to the vapors of this product. Exposure to the vapors may cause respiratory irritation. If you suspect exposure, get medical attention immediately.

In CASE OF SPILL, immediately wet materials and dispose of as Hazardous Waste under the appropriate state or local regulations. 

KEEP OUT OF REACH OF CHILDREN. PROTECT FROM FREEZING.

Refer to Safety Data Sheet for additional health and safety information.

AURA® Waterborne Interior Paint

General Description
Aura® is a waterborne interior paint system designed to offer superior durability and easy application for any surface without the concerns of incomplete coverage and inconsistent color. Aura® is a waterborne paint system specifically designed for use with high performance decorative finishes. Aura® offers excellent coverage and unmatched color consistency. Aura® is ideal for use in residential and commercial applications.

Features
- Easy application
- Excellent sheen
- No Voc

Certifications & Qualifications
- VOC compliant in all areas according to the California Low VOC standard.
- Highly resistant to alcohol and water.

Technical Assistance
Available through your local authorized independent Benjamin Moore retailer. For the location of the retailer nearest you, call 1-800-726-9105 or visit www.benjaminmoore.com.

**CORIAN® SOLID SURFACE PRODUCT INFORMATION NA/ENGLISH**

**1/4", 1/2", 3/4" Sheets**

Enjoy the ultimate in design flexibility for remodeling and new construction projects.

- Offers design versatility—can be cut, shaped, and thermoformed.
- Joints sheets together with Joint Adhesive for Corian® to create a sheet of any size.
- Can be used in vertical applications, including wall cladding and wet walls.
- 1/4" (6 mm) sheet is recommended for vertical use only.
- Can be used in horizontal applications, including: countertops, vanity tops, desk tops, island tops, laboratory tops, workstations and window sills.
- Custom sizes available. Minimum order quantity varies by product.
- Custom colors available. Minimum order quantity - 1 sheet.
- See Corian® Solid Surface Color Options (K-26836) for available colors.
The translucency of Corian® sheet is especially striking in the lighter colors as well as in thinner sheets. As a result, many designers are using it to create lamps or lighting effects in various applications.

Inlaying Corian® Solid Surface with different materials or with different colors of Corian® is possible and can enhance the inherent beauty of the material. Inlays and logos can also be created on Corian® Solid Surface using dye sublimation or direct printing techniques.

FABRICATION AND INSTALLATION

Corian® Design trains and certifies fabricators and installers who are provided detailed information regarding proper procedures; the following is a general overview, not a comprehensive guide to proper use.

Seams

Since its introduction in 1967, Corian® Solid Surface has proven itself to be remarkably durable, versatile and easy to live with in both the home and commercial environments. Corian® Solid Surface is nonporous with a smooth, seamless appearance. With proper cleaning, the material does not promote the growth of mold, mildew and bacteria.

Corian® Solid Surface is an advanced composite product used as an architectural and design material in a variety of residential and commercial applications. Corian® Solid Surface offers design versatility, functionality and durability. Supplied in sheets and shapes, it can be fabricated with conventional woodworking tools into virtually any design. It is the original Solid Surface material made only by DuPont. It is widely accepted as a material for countertops, vanity tops, tub/shower walls, kitchen sinks, vanity bases and laboratory bench tops in numerous markets including healthcare, hospitals, banks, boutiques, restaurants.

Composition

Corian® Solid Surface is a solid, nonporous, homogeneous surfacing material, composed of acrylic resin (also known as methacrylate) and the other natural minerals. These minerals are composed of aluminum trihydrate (ATH) derived from bauxite, an ore from which aluminum is extracted. Corian® Solid Surface sinks and lavatories utilize a acrylic-modified polyester resin. For more information on the composition of the material, please consult the Corian® Solid Surface Safety Data Sheets (SDS) available via the distributor's website or via your local supplier.

STANDARD PRODUCTS

Corian® Sheets

Available in various standard thicknesses, easy cut to size by professional fabricators.

All colors in the standard color palette are available in 12 mm (1/2") sheets that are 30" x 60" (760 mm x 1524 mm). Select colors may be available in 19mm (3/4") sheets with the same length and width of 6 mm (1/4") sheets that are 30" x 60" (760 mm x 1524 mm). 36", 48", 54" and 60" (910, 1219, 1372, and 1524 mm) wide sheets are available to support. Consult the Corian® Design website, corian.com or Corian® Solid Surface Sheet Product (K-29816) and Corian® Solid Surface Color Options (K-20068) for more details.

Limitations

Although Corian® Solid Surface can withstand high temperatures, it should be protected against direct heat with hot pads or heat shields. Use of 6 mm (1/4") sheets should be restricted to vertical applications or certain furniture applications only. The choice between 12 mm and 19 mm (1/2" and 3/4") is generally based on performance and cost considerations.

Due to the complex blending of natural minerals and man-made acrylic, slight color variations may be found within a sheet or from sheet to sheet of the same color. However, checking for color matching is an essential element of sheet inspection before fabrication.

Corian® Solid Surface is nonporous so spills and stains remain on the surface. However, some chemicals can stain, discolor or damage the surface of Corian® Solid Surface. These chemicals include strong acids (like concentrated sulfuric acid), ketones (like acetone), chlorinated solvents (like chloroform) or strong solvent combinations (like paint remover). The extent of the damage will depend on the length of contact. Except for strong solvents such as paint remover, short periods of contact will not usually cause serious damage to Corian® Solid Surface. Acid drain cleaners should not be used as they can damage both Corian® Solid Surface and any plastic plumbing beneath. Corian® Solid Surface is not recommended for use in photographic processing laboratories. More information can be found in Corian® Chemical Resistance (K-27406). In some hospital applications where strong disinfectants come in contact with Corian® applications, the recommendation is to use solid colors and avoid extended contact.

Performance Properties and Characteristics

Typical performance properties of Corian® products are shown in Corian® Property Specifications (K-26929). The performance of Corian® sheet may vary according to the thickness of the material, in aesthetics and surfaces

Colors and patterns run through the entire thickness of the material and cannot wear away or delaminate. Joints can be glued inconspicuously, making virtually unlimited surfaces possible.

Corian® Solid Surfaces are restorable, meaning they can be fully repaired by ordinary mild abrasive cleansers and a scouring pad. Cigarette burns, for example, can be easily removed in this way. Damage caused by abuse can usually be repaired on site without having to completely replace the material.

Corian® Solid Surface is nonporous with a smooth, seamless appearance. With proper cleaning, the material does not promote the growth of mold, mildew and bacteria.

Corian® Solid Surface is nontoxic and nonallergenic to humans. Corian® Solid Surface meets or exceeds emissions guidelines for volatile organic compounds (VOCs), hazardous air pollutants (HAPs) and has achieved GREENGUARD GOLD Certification.

When burned, it releases mainly carbon oxides and the smoke generated is optically light and does not contain toxic halogenated gases. Because of these properties, Corian® Solid Surface is used in public spaces and delicate applications such as airport check-in counters, wall and work surfaces in hospitals and hotels.

Corian® Solid Surface products can be thermoformed in wooden or metal molds at controlled temperatures in order to create various 2D and 3D design objects. Embossing effects can also be created.

Sealants and Adhesives

Corian® Solid Surface is compatible with many commercially available caulks and sealants. 100% silicone products are recommended. Vertical panels of Corian® may be installed over suitable substrates, including water-ooze resistant wooden board, marine-grade plywood and ceramic tiles. In case a support is needed, apply perimeter frame or solid support direct to Corian® using large beads of flexible adhesive having a space with a minimum thickness of 1/16" (1.5 mm).

For making seams in countertops, repairs and custom edges, color-coordinated Corian® Joint Adhesive should be used. When used in accordance with manufacturer's instructions, it provides a smooth and inconspicuous joint. Corian® Joint Adhesive is available from Corian® Design or its distributor.

Clearyances

The minimum expansion clearance in inches for Corian® Solid Surface is 2.2 x 10^-6/in/°F x (length of the piece of Corian® Solid Surface in inches) x (biggest temperature range expected in °F) In mm the minimum expansion clearance is 3.9 x 10^-5 mm/mm °C x (length of the piece of Corian® Solid Surface in mm) x (biggest temperature range expected in °C). Joints to be caulked should be a minimum of 1/16" (1.5 mm) wide to allow satisfactory sealant penetration and expansion.

Corian® Solid Surface is nonporous so spills and stains remain on the surface. However, some chemicals can stain, discolor or damage the surface of Corian® Solid Surface. These chemicals include strong acids (like concentrated sulfuric acid), ketones (like acetone), chlorinated solvents (like chloroform) or strong solvent combinations (like paint remover). The extent of the damage will depend on the length of contact. Except for strong solvents such as paint remover, short periods of contact will not usually cause serious damage to Corian® Solid Surface. Acid drain cleaners should not be used as they can damage both Corian® Solid Surface and any plastic plumbing beneath. Corian® Solid Surface is not recommended for use in photographic processing laboratories. More information can be found in Corian® Chemical Resistance (K-27406). In some hospital applications where strong disinfectants come in contact with Corian® applications, the recommendation is to use solid colors and avoid extended contact.
CORIAN® SOLID SURFACE PRODUCT OVERVIEW

Precautions
Product dimensions are nominal. If tolerances are critical, review your needs with a Corian® specialist.

AVAILABILITY AND COST
Availability
Corian® Design sheet, shape, and accessory products are readily available through a worldwide network of Distributors and certified Fabricators/Installers.

Cost
Cost varies with color, thickness, and width as well as custom fabrication and installation details.

WARRANTY
DuPont offers limited commercial and residential warranties.

MAINTENANCE
Preventing Damage to Corian® Solid Surface
Avoid prolonged exposure to strong chemicals such as acids, bases, and organic solvents. Spills should be cleaned up promptly. Refer to Corian® Chemical Resistance (K-27406) for additional details regarding chemical exposure, and Corian® Solid Surface Care and Maintenance for Facility Managers (K-29183) for clean-up, and general maintenance. In case of exposure to the specifications listed in the Class I Reagent section, the 10-year limited product warranty will be void and handled as a case of abuse. While unaffected by minor impacts, Corian® Solid Surface can be damaged by heavy impacts, especially from pointed objects. It can also be damaged by excessive heat. A local Corian® Design specialist can help you incorporate heat management into your design.

Repairing Corian® Solid Surface
Corian® Solid Surface provides superior value by being inconspicuously repairable in most cases. Minor cuts, scratches, and stains can be removed by causes using fine sandpaper and Scotch-Brite” pad. Deeper cuts or impact damage such as cracks may require an authorized Corian® fabricator/installer to make inconspicuous repairs.

ADDITIONAL INFORMATION
For further information or support please contact your local distributor, visit corian.com or call 1-800-4-CORIAN (800-426-7426).

Cambiando le prospettive del progetto contemporaneo: dimensioni sorprendenti in sole 6 mm di spessore, leggero, versatili, resistenti, esteticamente fuori dall’ordinario.

Modern design perspectives are changing. Amazing sizes, in a thickness of just 6 mm, light, versatile and strong, with extraordinary aesthetic appeal.

Les perspectives de la conception contemporaine évoluent: dimensions surprenantes en seule 6 mm de épaisseur seulement, léger, polyvalent, résistant, esthétiquement originale.

Die Perspektiven der heutigen Projekte ändern sich: Überraschende Größen mit nur 6 mm Stärke, leicht, vielseitig, widerstandsfest, außergewöhnlich schön und natürlich.

Cambia il panorama del design contemporaneo: formato sorprendente in solo 6 mm di espessore, leggero, versatili, resistenti, esteticamente fuori dal comune.

Современный дизайн переориентирует наши представления: грандиозные размеры при толщине всего 6 мм, легкость, универсальность, прочность, необыкновенная эстетика.

### PLUS

- Grandissimi formati, fino a 160x320 cm.
- 6 mm di spessore.
- Possibilità di tagli di qualsiasi forma e dimensione.
- Facile da trasportare e montare.
- Può essere utilizzato per il rivestimento.
- Elevata resa estetica.
- Notevole resistenza alle sollecitazioni.

- Extralarge sizes, up to 160x320 cm.
- Only 6 mm thick.
- Possibility of any shape and size.
- Easy transport and handling.
- Perfect for transport and installation.
- High aesthetic yield.
- High resistance to solicitations.

- Très grands formats, jusqu'à 160x320 cm.
- 6 mm d'épaisseur seulement.
- Possibilité de coupes de tous formats et dimensions.
- Transport et manutention faciles.
- Revestimiento y alta resistencia.
- Elevada resistencia a las solicitudes.

- Ultragroße Formate, bis zu 160x320 cm.
- Nur 6 mm Dicke.
- Die Möglichkeit, jede beliebige Form und Größe zu schnitzen.
- Leicht zu transportieren und zu handhaben.
- Verlegung sowohl am Boden als auch an der Wand.
- Hohen ästhetischen Anprall.
- Resistente a las solicitaciones.

#### S-01

**la roche grey**
la roche di rex

3/8" Spessore / Thickness Epaisseur / Dicke Espesor /

Due to the different production technologies, the installation of products with different thickness may give a non-homogeneous result. For this reason we do not recommend this option.

Vu que différentes technologies de production sont utilisées avec des épaisseurs différentes, des problèmes d'homogénéité pourraient se présenter, il est donc déconseillé de les poser ensemble.

Wegen unterschiedlicher Produktionstechnologien können die Fliesen mit verschiedenen Materialstärken optische Differenzen aufweisen. Von einem direkten Aneinanderlegen wird de shalb abgeraten.

Dadas las diferentes tecnologías productivas, la combinación de productos de diferentes espesores podría dar lugar a heterogeneidad, por lo que se desaconseja mezclarlas.

In relazione alle differenti tecnologie produttive l'accostamento di prodotti con spessori diversi potrebbe presentare delle disomogeneità, se ne sconsiglia pertanto l'abbinamento.

Il primo passo per la posa del materiale è verificare che il sottofondo sia privo di fessurazioni, correttamente stagionato ed omogeneo, pulito e planare. La massima deviazione di planarità accettabile è 1mm con staggia da 2 metri.

Check the laying substrate has no cracks, it is homogeneous and mature, totally clean and flat. Maximum deviation from flatness of 1mm per 2 meters length measured.

Applicare il collante sul retro della lastra con una spatola con denti da 3mm (1). Il collante consigliato è classe C2TE S1 ed è necessario stenderlo lungo una sola direzione (2).

First apply the adhesive onto the back of the slab with a 3mm-tile trowel (1). The recommended adhesive is C2TE S1 and it must be spread over in one direction only (2).

Stendere contemporaneamente la colla sul sottofondo (3). L’applicazione del collante deve essere effettuata con l’utilizzo di una spatola a denti tondi da 15mm o denti inclinati da 10mm, seguendo la stessa direzione precedentemente applicata sul retro della lastra (4).

At the same time, spread the adhesive onto the floor substrate (3) using a 15mm U-notch or a 10mm V-notch trowel and following the same direction as previously applied to the back of the slab (4).
Utilizzando l'apposito telaio a ventose posizionare la lastra sul letto di colla (5,6), facendo attenzione a mantenere una fuga minima di 3mm.

Using the appropriate sucker frame, position the slab on the adhesive bed (5,6), being careful to maintain a minimum joint of 3mm.

Per assicurare il completo incollaggio e la completa fuoriuscita dell’aria, battere la lastra con l’apposito frattazzo antirimbalzo in gomma (7). È importante che il processo sia effettuato partendo dal centro verso gli spigoli.

Tap the slab with a rubber trowel for a complete fixing (7), ensuring the air is expelled. It is recommended to start from the centre of the slabs and then move towards the edges.

Completeare poi le operazioni di posa utilizzando un sigillante adeguato e mantenendo una fuga di almeno 3mm tramite l’impiego di distanziatori (8). Per agevolare questa fase, esiste in commercio un dispositivo accosta-lastre (9), appositamente ideato.

Complete the laying operations using a suitable sealant, while keeping at least a 3mm joint through the use of spacers (8). To make this task easier, use the special device for pulling over the slabs, available on the market (9).

Si consiglia l’uso di cunei livellanti (10) da applicare in corrispondenza degli spigoli e a ogni metro lineare della lastra (11), per evitare eventuali dislivelli tra lastre adiacenti.

Levelling wedges at each linear metre of the slabs are recommended (10-11).

#### TRACE

**Work Surface Supporting Lateral File**

**FEATURES**
- Two file bars are included in each file drawer, for side-to-side filing
- File drawer bin will accommodate A4, Letter, and Legal size filing
- Includes top channels for mounting under a work surface
- Countertop is not required if installed beneath a desk work surface or otherwise anchored or ganged to another cabinet
- Not to be used as a freestanding cabinet, because no countertop is included
- The inside dimension of the bottom lateral drawer: height - 10.75", width - 27.3", depth - 18.0"

**OPTIONS AND ACCESSORIES**
- Laminate drawer fronts may be specified
- Polyethylene drawer front fillers increase sound absorption
- Individually locking drawers, either keyed or electronic
- File conversion bars for front-to-back filing
- Magnetic label

**Drawer Load Capacity**
- 30", 36", 42" drawer: 125 lbs

**Lock System**
- Includes randomly-assigned UM Series locks - black-faced, master-keyed, and core-removable. Other key series are available, including bright nickel, etc., and NT

#### TRACE

**Work Surface Supporting Pedestals**

**FEATURES**
- Top channels are exposed, to attach to underside of work surface
- Special 27" and 24-3/4" heights accommodate low profile work surfaces
- Countertop not included; a Work Surface Supporting Pedestal cannot be used in a freestanding application
- Drawers can accommodate letter, legal, and ledger filing. Legal and ledger filing require a file drawer divider, sold separately

**BASIC CONSTRUCTION**
- Four leveling glides with 1-5/8" adjustment ensure proper alignment and operation
- Leveling glides are not interchangeable with casters

**DRAWER LOAD CAPACITY**
- 3" pencil box drawer: 50 lbs
- 6" box drawer: 50 lbs
- 12" file drawer: 70 lbs

**OPTIONS AND ACCESSORIES**
- Box drawer dividers snap into position and remain in place
- File drawer dividers snap into position to accommodate side-to-side filing
- Pencil trays include four compartments and sit on top of the sides of the box or file drawer bin
- Laminate drawer fronts may be specified
- Polyethylene drawer front fillers increase sound absorption

**LOCK SYSTEM**
- Includes UM series locks, key-aided, black-faced, master-keyed, and core-removable (may be key-aided in the field)
- To specify an electronic lock instead of key lock, add an “E” after the “U” or “T” of the part number and add $150 to the list price

SKU: CH372-01  
**PRICE:** $148.00  
**COLOR:** NAVY  
Also available in (White, Smoke)

We love the versatility of this piece, and not just because it’s pretty to look at. Use it to keep bath time essentials near the tub, as a charming nightstand for the kids, or a pretty perch for a small plant. It’s naturally water-resistant, so it stands up to moisture like a champ. Painted legs give the wood’s matte finish a modern pop.

**DELIVERY METHOD**  
Fedex

For delivery details, visit the product page on serenaandlily.com, and see the Shipping & Delivery section.

**DIMENSIONS & CARE**  
Solid teak.  
15"W x 14"D x 13"H overall.  
Each step: 15"W x 6.5"D.  
Holds up to 50 lbs. As a safety precaution, do not let children use this as a step stool unsupervised.

TB-ACC69

800.356.1200

**Versa-Frames**  
Double-Sided Sign and Poster Displays  
- Steel construction with black powder-coated finish  
- Vertical/landscape orientation  
- 14" channel on top for easy-standing and changing of materials  
- Double-sided poster frame measures 28"H x 22"W  
- Available with or without a white tackboard panel insert with protective vinyl sheet  
- No-tip base design

**Deflecto® Indoor Double-Sided Magnetic Sign Stand**  
- Steel frame with a black powder-coated finish  
- Double-sided stand displays 8 1/2" x 11" inserts in vertical/landscape orientation  
- Clear acrylic front panels have green-tinted borders to provide the lightest look of glass  
- Adjustable, 8 1/2" x 11" bases in set of two  
- Inlaid black powder-coated stand back panel frames your message  
- Inlaid black powder-coated stand back panel frames your message  

**Safco® Write-Way® Message Boards**  
- Simple, important messages stand out in high-traffic areas  
- Black molded-plastic frames  
- show-turning, double-sided sign holds weeknight magnets  
- Removable backing reveals chalkboard surface  
- Reusable and easy to clean boards are versatile—hang required board to 45° or down to test students and visitors’ sight  
- 18" dia. boards can be filled with sand or water for added stability  
- Measures: 18" H x 18" W x 18" D overall

**Quartet® Designer Curved Sign Stand**  
- Steel frame with anodized silver finish  
- 11" x 17" sign panel rotates for vertical/landscape or horizontal/landscape orientation  
- Open front frame for quick-free sign changes  
- Weighted, 9"W x 14"D base provides solid support

**Deflecto® Indoor Double-Sided Magnetic Sign Stand**  
- Steel frame with a black powder-coated finish  
- Double-sided stand displays 8 1/2" x 11" inserts in vertical/landscape orientation  
- Clear acrylic front panels have green-tinted borders to provide the lightest look of glass  
- Adjustable, 8 1/2" x 11" bases in set of two  
- Inlaid black powder-coated stand back panel frames your message

**Signage can be viewed from both sides**  
- Vertical Radius Corner with Disc Base  
- Vertical Square Corner with Square Base  

For outdoor message boards see pp. 438–440  
PRAXES
### FEATURES
- Top is mechanically fastened, so may be replaced with laminate top
- Adjustable shelves provide versatile storage
- Combine 39-7/8” high cabinets with common laminate tops to build counter height work stations

### BASIC CONSTRUCTION
- Double Door Storage Cabinet metal gauge: Top, back, side and center panels are 21 gauge steel, inner top, bottom, and side channels are 18 gauge steel. Door fronts are 20-22 gauge steel. Shelves are 18 gauge steel.
- Concealed hinges allow for 110° opening
- Four leveling glides with 1-1/4” adjustment ensure proper alignment and operation, and are accessible from inside the cabinet
- Shelves are 3/4” thick and are adjustable in 1-1/2” increments

### OPTIONS AND ACCESSORIES
- Additional shelves are available for order
- Magnetic shelf divider, sold in packages of three

### LOAD CAPACITY
- 30”w: shelf-140 lbs  top-140 lbs
- 36”w: shelf-140 lbs  top-168 lbs
- 42”w: shelf-140 lbs  top-197 lbs

### LOCK SYSTEM
- Includes UM series locks, keyed alike, black-faced, master-keyed, and core-removable (may be keyed alike in the field)
- Double Doors Storage Cabinets are not available with individually locking doors
- To specify an electronic lock instead of keyed lock, add an “E” after the “C” of the part number and add $340 to the list price

### AVAILABLE LOCKS & FRONTS
- Full Pull
- Bar Pull
- Satin Nickel Pull

- (two contact sides required)
Profiles for surface mounting

Häfele Loox5 profile 2101 / 2102

- Material: Profile: Aluminum
  Diffuser: Plastic

- Finish/Color: Profile: Anodized; Diffuser: White opal, transmittance 70–80%

- Length: 2500 mm (98 7/16”)

- Diffuser width: Profile 2101: 13 mm (1/2")
  Profile 2102: 11 mm (7/16")

- Supplied with: 1 profile 1 diffuser

Diffusers

The diffuser creates a uniform light. The LED points are invisible from 120 LEDs/m. If required, please order alternative diffusers in black or transparent (only for 2102) separately.

Diffusers see page 40

Drivers

Häfele Loox5 driver constant voltage 12 V

- Version: With overload protection
  - Material/Color: Plastic, black
  - Degree of protection: IP20
  - Input voltage: 100–240 V~, 50–60 Hz
  - Output voltage: DC 12 V
  - Number of connections: 1x socket Loox5 12 V
  - Life time: >70,000 hours
  - Safety: Class 2
  - Supplied with: 1 driver with mounting accessories
  - 1 US power cord

- Maximum lead length from the Loox5 driver to the device is 10,000 mm (393 11/16”). Long cable lengths in combination with large loads (strip light lengths) can result in voltage drops in the cable. These lead to variable loss of brightness in the lights. The illuminance listed with the lights has been determined with the rated output voltage of the driver. (12 V or 24 V).

Installation Notes and Technical Drawing

Convenient power options at your fingertips, recessed into the table top and equipped with two power outlets rated 15A/125VAC and a dual USB Charger, plus two RJ45 Cat5 data jacks. Additional inserts available.

- Hinged lid swings for access
- 2 Power Outlets
- Dual USB Charger
- 2 Cat5e Data Jacks
- ETL Listed

Hinged lid flips up for access and can remain open while in use, on close the lid and run cabling through the slot for a clean in-use look. Also includes a brush liner to prevent dust and debris from falling through the opening. Bushings on the bottom of the unit line two additional openings for cable pass through from underneath, and the unit can accommodate up to two additional single phone or data jacks.

Overall: 8-7/8" x 5-7/32".

Cut Out: 8-3/8" x 4-3/4".

6 ft. power cord. Data modules are wired.

Finishes: Matte Black, Metallic Silver, Satin Aluminum and Satin Stainless Steel. Also available unloaded without the dual Cat5 insert so you can populate with an alternate insert, PCS90/USB-U, or hardwired, PCS90/U1/HW. For a list of additional inserts, click here.

ETL listed and tested to meet UL962A (Furniture Power Distribution). Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

Installation Notes and Technical Drawing

Description

Convenient power options at your fingertips, recessed into the table top and equipped with four power outlets rated 15A/125VAC and a dual USB Charger, plus two RJ45 Cat5 data jacks.

- Hinged Lid opens for access
- 4 Power Outlets
- Dual USB Charger
- 2 Cat5 Data Jacks
- ETL Listed

Hinged lid flips up for access and can remain open while in use, or close the lid and run cabling through the slot for a clean in-use look. Also includes a brush liner to prevent dust and debris from falling through the opening. Two additional openings at the bottom of the unit can accommodate additional inserts for audio/video options or additional data, or they can just be used for cable pass through from underneath.

Units have a power outlet underneath which may be helpful in training rooms or libraries. Circuit breaker reset is located under the unit inside the data compartment.

Overall: 14-3/16” x 6-11/32”.
Cut Out: 13-11/16” x 5-7/8”.
6-ft. power cord.
Data modules are unired.

Finish: Matte Black, Metallic Silver, Satin Aluminum and Satin Stainless Steel.
Also available unloaded without the dual Cat5 insert so you can populate with an alternate insert, PCS91-USBU or hardwired, PCS91-U1/HW.

ETL listed and tested to meet UL62 (Furniture Power Distribution). Electrical codes vary by location. Please check with your electrician to verify that this unit meets your local code before installing.

A-02

3-Tiered Literature Rack, 4"/8.5"w, Tabletop, 9-15 Pockets - Black

Description
Acrylic Literature Rack with 15 Adjustable Width Pockets

Do you need an acrylic literature rack that can hold both 4" and 8-1/2" wide materials? Do you have a large number of brochures to display? This acrylic literature rack is the perfect solution. This is a great countertop display that allows users to display corporate literature in an organized fashion while at the same time consuming little space. Each acrylic literature rack is made with quality materials that will withstand years of use in any business environment. The front panel on this brochure holder is made with clear acrylic to ensure viewers can see the front view of leaflets in their entirety. The slanted back of this acrylic literature rack is made with the same high quality materials, but in a glass black finish. The contrasting clear and black materials make for a unique look that will surely impress customers.

This acrylic literature rack has three tiers of adjustable pockets mounted on a gloss black base. Pockets are easily configured for either 4-1/8" or 8-1/2" literature. The pegs separators make this acrylic literature rack a versatile brochure holder. Choose to use all of the pegs to create a rack strictly for leaflets, or use any number of the separators to create a custom design. The flexibility of this acrylic literature rack makes it a vital display for any commercial office such as a hotel lobby, travel agency or visitor center. The tiered design allows for a partial view of the middle and most rows. Offices that use this acrylic literature rack typically place taller magazines on one side or across the back, while placing shorter brochures in the front for optimal viewing.

Specifications
3branch Freestanding Safety Shield - 30 in.H x 30 in.W x 12 in.D

**Details**

- **Construction:** Clear, cast acrylic
- **Dimensions:** 30"H x 30"W x 12"D

**Specifications**

**Shipping**

- **Construction:** Clear, cast acrylic
- **Dimensions:** 30"H x 30"W x 12"D

**Product Description**

Ideal for high-traffic areas, such as entryways, classrooms, main offices, and lunchrooms.

- Stand accommodates any standard wall hand sanitizer dispenser (sold separately)
- Stand frame made of sturdy 18-gauge steel
- Stand measures 50"H x 15-3/4"W x 15-3/4"D

**Related Products & Accessories**

- Copernicus Hand Sanitizer Stand 50"H x 15-3/4"W x 15-3/4"D
- Item #: W13805200
- This product ships directly from the manufacturer in approximately 7 working days.

**Copernicus Hand Sanitizer Stand**

- **Item #:** W13805200
- **Retail:** $332.92
- **Your Price:** $221.95

**Copernicus Hand Sanitizer Stand**

- **Height:** 50"
- **Width:** 15-3/4"
- **Depth:** 15-3/4"

SHELF ORGANIZATION  •  Shelf Label Holders  •  Supplies

**Index Blocks**

- Environmentally-friendly polypropylene construction
- Easily move blocks as collections grow
- Book Support Blocks (P142-0322) hold books, upright while marking an area
- Single Clip-On Blocks (P805154) fit shelves up to 1" thick
- Shelf Stopper Blocks (P805152) grab onto the edge of shelving to stay in front
- Single Blocks (P805153) provide a visual and physical marker
- Double Blocks (P142-0327) have flat, wide bottoms and use easy-to-read, wider inserts
- Optional A-Z Inserts, Plain Inserts and Insert Protectors (sold separately)

**Titan™ Steel Shelf Label Holders**

- Durable steel withstands years of repositioning
- 18-gauge steel construction
- Scratch- and chip-resistant powder-coat finish
- Adjustable tension support creates a tight fit on 3⁄4" or 1" thick shelves
- Side-loading design
- Adhesive labels are held in place by their own weight and can be repositioned
- Permanent holders mount directly to shelves using fasteners (not included)
- Slip-On Holders have a wide lip that goes under shelf for added support
- Blank white inserts and clear plastic protectors sold separately

**Inserts & Insert Protectors**

- Bold graphics are clearly visible
- Specification and orientation
- Durable design
- For matching Titan™ Book Supports see pp. 512–513

**Movable Slip-On Holder**

- Adjustable tension support creates a tight fit on 3⁄4" or 1" thick shelves
- Side-loading design
- Movable Holders are held in place by their own weight and can be repositioned

**Permanent Holder**

- Mount directly to shelves using fasteners (not included)
- Slip-On Holders have a wide lip that goes under shelf for added support

Environmental Considerations:

Environment: Excessive humidity, salts, or other chemical agents can corrode the finish and steel, resulting in paint failure and rusting. Fasteners such as screws or nails can result in the finish being damaged or scratched.

Allen Key: Improper set-screw alignment can result in a system that is ineffective and unsafe.

Installation:

233 Pilaster Standards can be installed in the surface. The 255 Pilaster Standard can be mounted with nails, screws, or screws. Pilaster Standards can be installed in the surface, made flush or be hidden with a head screw and appropriate hollow wall anchor to properly secure the standard.

Availability:

233 Steel Standards are available in steel or aluminum. They must be right-side up and in need of screw fasteners. All standards are available in various styles/finish options. 255 and 255 Steel Pilaster Standards are adjustable on 1/2” centers.

Composition and Materials:

233 Steel Standards: 23 gauge high-strength steel.

255 Steel Standards: 23 gauge high-strength steel.

233 and 255 Steel Pilaster Standards are available in 1/2” centers.

Material:

233 Steel Standards: 23 gauge high-strength steel.

255 Steel Standards: 23 gauge high-strength steel.

255 Aluminum Standards: 1/2” gauge aluminum.

Bases:

233 Steel Standards: 23 gauge high-strength steel.

255 Steel Standards: 23 gauge high-strength steel.

233 and 255 Steel Pilaster Standards are adjustable on 1/2” centers.

Finish:

233 Steel Standards: Brass (plated cold rolled steel), and Zinc (plated cold rolled steel).

255 Steel Standards: Aluminum (powder-coated cold rolled steel), Zinc (aluminum). 233 and 255 Steel Pilaster Standards are adjustable on 1/2” centers.

4. Technical Data

Applicable Standards: The Kw 255 Steel Standard, when used with specific Kw steel shelf rests, has been tested and meets the AS/NZS 4033:2002 standard for steel shelf systems. All Kw standards are tested in a fully configured application to ensure proper performance, durability, and safety. The Kw standard shelf support load is intended as a guide only and not a warranty. Actual load bearing capabilities depend upon the type of cabinet/movie material and use of other Kw shelf standard mounting hardware. Installable technique, shelf standard spacing, shelf size and construction.

Knap & Vogt offers its standard Limited Lifetime Warranty for the initial purchase of commercial products. However, representative testing in a fully configured application is the only way to assure proper performance, durability, and safety. The Kw standard shelf support load is intended as a guide only and not a warranty. Actual load bearing capabilities depend upon the type of cabinet/movie material and use of other Kw shelf standard mounting hardware. Installable technique, shelf standard spacing, shelf size and construction.

Knape & Vogt and area representatives can assist with any application. For further information, or for the name of the nearest representative nearest you, please call Knape & Vogt.

For existing units. This information conforms to editorial style prescribed by The Construction Specifications Institute.

- **Miscellaneous Supports**

**Non-stock item – minimum order quantities and additional lead time may apply.**

**NOTE:** Slight variations in color/finish may occur when using different product materials, such as steel and aluminum, shown here.
**High-Profile Strut Channel**

Up to two times the height of regular strut channel, this high-profile channel is stronger than regular strut channel.

Stiffened Holes—Are 1 1/2" Lg. x 1 1/2" Wd. on 2" centers. The first hole is 1 1/4" from the end. A 3 1/2" channel is 1 3/4" from this hole.

Zinc-plated steel channel is more corrosion resistant in wet environments than powder-coated steel.

Galvanized steel channel has better corrosion resistance in wet environments than zinc-plated steel and can be used outdoors.

Choose-a-Color Steel has the best风貌 steel color.

Primed steel is 7/8" more corrosion resistant than zinc-plated steel.

Green Powder-Coated Steel has better corrosion resistance in wet environments than zinc-plated steel and can be used outdoors.

Black Powder-Coated Steel has better corrosion resistance in wet environments than zinc-plated steel.

**Low-Profile Strut Channel**

Half the height and the same width as regular strut channel (1/4" H x 1 1/4" Wd.), this low-profile strut channel fits in tight spaces, with many of the same features.

Stiffened Holes—Are 1 1/2" Lg. x 1 1/2" Wd. on 2" centers. The first hole is 1 1/4" from the end, except yellow steel is 1/2" and primed steel is 1/4".

Zinc-plated steel channel is more corrosion resistant in wet environments than powder-coated and choose-a-color steel.

Galvanized steel channel has better corrosion resistance in wet environments than zinc-plated steel and can be used outdoors.

Choose-a-Color Steel is available and ready to be painted.

Aluminum channel is about half the weight of steel and resists corrosion in wet environments.

304 stainless steel channel is more resistant to corrosion than galvanized steel. It also has good chemical resistance.

316 stainless steel channel has excellent resistance to chemicals and salt water.

6" length channel is for use with beams spaced 6 ft. apart. The length varies up to 4" to attach the channel to beams.

For choose-a-color steel, please specify black, white, or yellow.

**Extra Low-Profile Strut Channel**

Cable and tubing to the tightest spaces with channel that is one-quarter the height and one-half the width of the regular strut channel (1/8" H x 1 1/4" Wd.).

Zinc-plated steel channel is more corrosion resistant in wet environments than powder-coated steel.

Aluminum channel is about half the weight of steel and resists corrosion in wet environments.

Choose-a-Color Steel has the best风貌 steel color.

316 stainless steel channel has better corrosion resistance than zinc-plated steel. It also has good chemical resistance.

**Humidity-Tolerant Strut Channel**

Cable and tubing to the tightest spaces with channel that is one-quarter the height and one-half the width of the regular strut channel (1/8" H x 1 1/4" Wd.).

Zinc-plated steel channel is more corrosion resistant in wet environments than powder-coated steel.

Aluminum channel is about half the weight of steel and resists corrosion in wet environments.

Choose-a-Color Steel has the best风貌 steel color.

316 stainless steel channel has better corrosion resistance than zinc-plated steel. It also has good chemical resistance.

H-06

Office Organization
Cable Management

→ Wire Management Tray

- Line under work surfaces to manage wires
- Solid yet lightweight aluminum construction
- Includes larger entry/exit holes evenly spaced for larger plugs
- Screw-mounted
- Material: Aluminum

Tranz

With no anchoring leg, this reducer is perfect for commercial projects with existing tile.

All of our Tranz reducers are ADA compliant, and have anti-slip tread lines.

You can glue down our CTC Tranz with construction adhesive or mechanically fasten in the field.

Anodizing is a process which thickens the natural oxide on aluminum. A direct electrical current is passed through a bath of sulfuric acid, producing a film that resists scratches and basic wear and tear.
Golden Lemon Thyme

Thymus x citriodorus 'Aureus'

Uses: Culinary, Medicinal, Aromatic

Duration: Perennial (hardy in zones 5-9)

Leaves are unique for their variegated appearance with deep green centres and yellow borders. Pink flowers add to its eye catching look! Has a dense, low growing habit and is perfect for rock gardens. Like standard lemon thyme, this variety can be used in the kitchen. Plant in sandy, well drained soil in full sun. Thyme is typically low maintenance, but will need to be trimmed back after flowering to encourage a bushy growth. Sensitive to over watering, as thyme is susceptible to fungal diseases and root rot. Harvest in the morning, just before flowering as concentrations of aromatic oils are highest at this time.
