RE: Questions on notice

Bright New World was asked by Ms. Zali Steggall in the hearing on 2nd October 2019 pertaining to the references used to support the claim in our submission (No. 168) on national consensus. The claim Ms. Steggall refers to is:

Data is showing Australian’s are more open to nuclear power than perceived, especially calling for the prohibition on nuclear power to be lifted. When people have been asked internationally to vote to close their nuclear plants they have voted against those motions.

The sources for these claims can be found in references 66 to 74, these have been reproduced below:

71 - Channel Nine, 2019. 9 News Australia. [Online] Available at: https://www.facebook.com/9News/posts/2725697980811355

Further to these references, a poll released by Roy Morgan on the 7th October 2019 reaffirms the claim made in the relevant section in the Bright New World submission showing 51% supporting and 34% opposing nuclear power development in Australia.
