GREENPOINT RATED EDITION:

SINGLE FAMILY 3.7 - 2005 CA ENERGY CODE

82

- 3**  Community: Green building offers solutions for decreasing traffic, improving access, and making neighborhoods safer and more enjoyable.
- 40**  Energy: Efficient energy practices including renewables provide effective strategies for reducing a home's energy use while increasing comfort.
- 13**  IAQ/Health: Green building addresses ventilation practices, products, and installation practices to reduce sources of indoor air pollution.
- 11**  Resources: Green building favors material and practices that reduce waste, conserve natural resources, and have increased durability.
- 15**  Water: Effective water management systems and efficient indoor and outdoor water use protect and conserve freshwater supplies.
