PROCEDURE

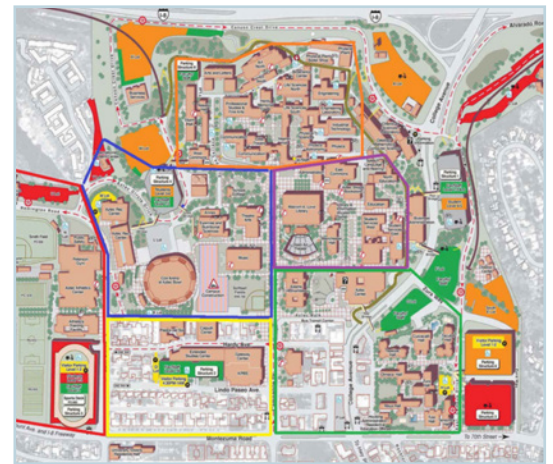

1. Determine the day and time the cleanup will be conducted. Many clean ups last one hour, but can be shortened if needed.
2. At least two weeks prior to the event, contact campus facilities and request that they not pick up tobacco waste for one week prior to your event.
3. Determine what will be done with the collected waste. Consider displaying the collected tobacco waste in a clear container to bring attention to the issue, educate the community on tobacco and the environment, and to promote your program and the campus policy. Remember, tobacco waste is toxic waste and extremely smelly. Whatever container you use, be sure it can contain the odor of the butts.
4. Divide the campus into sections and assign students to different zones to efficiently clean the area. Cleaning the entire campus may not be feasible; choosing focus areas may be necessary for smaller groups.
5. Send students out in pairs or small groups with one student taking a tally of each butt while another picks the butts up.
6. Ask students to also keep a record of the number of individuals that they observe smoking or vaping during the event.
7. Give each pair of students gloves, a ziploc bag, and a permanent marker. Have them write the total number of butts collected, people smoking, and people vaping, on the bag with the marker.
8. Assign one or two students to be the photographer. Post pictures and results to social media channels.
9. **FILL OUT THE DATA COLLECTION FORM AND RETURN IT TO CYAN:
INFO@CYANONLINE.ORG**

Cigarette Butt Pick-ups are a great way to engage young people in policy advocacy on campus. You can also use this data to evaluate the effectiveness of your smoke or tobacco-free policy on campus. Use the same procedure each time you conduct this event so that you can compare your results to previous years.

MATERIALS NEEDED

- Large mason jar or other smell-proof container in which to keep the butts
- Plastic/latex gloves and hand sanitizer
- Clipboard with paper and pen for each zone
- Permanent markers
- Gallon-size ziploc bags
- Campus maps marked with zones (if you have a large group of volunteers) or focus areas (if you have a small group)
- Camera

TIPS AND THINGS TO REMEMBER

- Working with campus facilities/maintenance is important to getting an accurate picture of how many people are continuing to smoke on campus.
- Cigarette butts are toxic and smelly. You will not want to recount the butts. Having one student in charge of keeping a tally while another one picks up the butts will help with keeping an accurate count.
- In addition to picking up butts, pick up other tobacco-related waste (tips from little cigars, cigarillo wrappers, e-cigarettes, packaging, etc.).
- Use the time to educate your volunteers about your work and what you're hoping to achieve (e.g., a tobacco-free campus). Volunteers can also collect petition signatures, letters of support, or pictures and stories of how tobacco use on campus affect them and their friends.

10 Minute Protocol

If you are unable to organize a butt pick-up event on campus, please conduct a 10-minute tobacco waste count in at least four different locations on campus including the front of your main campus library. You may pick up the butts (if you have gloves on) or just count them. Please use a timer and only count butts for ten minutes. Please note the number of individuals who assist you with the count (it's okay if it's just one person), the total number of tobacco butts counted, and the date. If this is your follow-up data (not baseline), please choose the same locations that you visited in the previous year. If new hot spots have emerged, add those as additional locations.
