

Loom Knit Pussyhat by Nola Woehrle

Loom knit hats are the fastest! Make with brim or without.

Use thick yarn and make the cylinder that is the hat shape.

When size has been reached (about 8" from start) carefully remove loops from pegs and remove loom.

Cut attached yarn to 15" and thread onto large tapestry needle.

Carefully pinch hat so that the loops lie front and back against each other with the yarn at one end.

Now, starting with the first loop, thread the needle through and then taking one loop from the back and the next one from the front go across all the loops until they are all threaded on the yarn in a flat line. (Do not pull yarn to gather!)

Feed needle through the final loop to the inside of hat and secure then clip end.

When you put the hat on the ears instantly POP! Done. You can make one in a couple of hours (if you include a brim)!!
