### **How to make this quilt:**

1. **Using this diagram, lay out your blocks in rows.** Sew blocks into rows and then rows together.

I printed it out and placed it right in front of my sewing machine and when it was time to work on that row, I folded it over so I could see the row I wanted to make. I also numbered my rows.

2. **Press** well.
3. **Sandwich**, using whatever type of batting and backing you prefer.
4. **Quilt** as desired.
5. **Bind**, using whatever method you wish.

**Congratulations! Your quilt is finished! Enjoy!**

I took pictures of this as it was developing to help inspire me.

This is what they looked like:

First 5 rows (1/4 done)

Then after 10 rows:

Then after 15 rows:

Taking these pictures helped me get excited about this quilt top unlike anything else I could have done. Sometimes you have to trick yourself into being/staying motivated! If I had made myself make all 380 blocks before laying it out, I'd probably still be making blocks.
