Medical & Psychosocial Aspects of Alcohol/Drug Use, Abuse & Addictions

Instructor: Charles Thiessen, LMHP

This course will discuss the physiological, psychological, and sociological impact of addiction. Participants will also gain knowledge of dependence, tolerance, and basic pharmacological effects, including: attitudes, beliefs, etiological, cultural and behavioral aspects.

Objectives:
• Students will increase their understanding of specific terms associated with medical and psychological issues.
• Students will become aware of personal biases and beliefs.
• Students will increase their understanding of the brain and its components and functions.
• Students will explore the neurophysiology of the central and peripheral nervous systems and how alcohol and dependence affect those systems.
• Students will increase their knowledge of street and illegal drugs, over-the-counter medications, and prescription drugs.
• Students will discuss the difference between demographic regions.
• Students will increase their knowledge of etiology, behavioral, and cultural aspects of alcohol and drug use.
• Students will increase their knowledge of multicultural issues when dealing with these drugs.

PLEASE NOTE:
Textbooks are no longer included in the cost of the class for core education trainings. You are responsible for obtaining the required textbook prior to the first day of class.
