THANK YOU!
Health officials: 1 in 50 school kids have autism

Use of Morning-After Pill Is Rising, Report Says
A finding likely to add to the debate over a requirement for many employers.

Adults gobbling fewer calories from fast food
People are getting lower percentage of calories from foods like burgers, fries and pizza.
2012-2013 Selected Reports

- Generalist and Specialty Physicians: Supply and Access, 2009–2010 (NAMCS)
- Prevalence of Uncontrolled Risk Factors for Cardiovascular Disease: United States, 1999–2010 (NHANES)
- Recent Declines in Infant Mortality in the United States, 2005–2011 (NVSS)
Today’s Update

- Budget Update
- Recent Activities and Program Highlights
Budget Update
FY 2014 Budget Request

- $181.475 M for Health Statistics
  - +$22.413 M above FY 2012 enacted ($138.683 M)
  - $20.379 for the new Working Capital Fund*

- Proposed $22.413 M increase supports:
  - Phase in electronic death records in remaining jurisdictions
  - Development and implementation of new sample designs for population-based surveys following 2010 Census
  - Improvement and expansion of data collection methods

* = not an actual budget increase

## WCF Overview

A WCF will promote effective cost control and increased efficiency for programs and service providers.

<table>
<thead>
<tr>
<th>What is a working capital fund?</th>
<th>• A WCF is a revolving fund with no year authority, that allows an agency to bill and collect fees for services and deposit them into the fund to finance the fund’s operations</th>
</tr>
</thead>
<tbody>
<tr>
<td>When did CDC receive authorization?</td>
<td>• In CDC’s FY 2012 appropriation, Congress authorized CDC to establish a WCF in FY 2014</td>
</tr>
</tbody>
</table>
| Why did CDC pursue a working capital fund? | • To improve the efficiency and effectiveness of business support services  
• To promote effective cost control within programs and service organizations  
• To achieve greater transparency by establishing a standard process for developing and reviewing rates and reporting on the actual costs of services  
• To enable CDC to finance long-term capital investments, while avoiding cyclical funding spikes |
| How will CDC’s working capital fund operate? | • In a WCF environment, programs will request services from service providers and the WCF will bill programs for business services consumed based on pre-established rates. |
WCF Overview: Services

WCF is a new funding mechanism for CDC business support services; these services enable programs to achieve the Agency’s mission.

CDC Mission:
Collaborating to create the expertise, information, and tools that people and communities need to protect their health – through health promotion, prevention of disease, injury and disability, and preparedness for new health threats.

WCF Service Categories
- Facilities, Safety, Security, and Logistics Services
- IT Services, Support, and Infrastructure
- Management Analysis Support Services
- Financial Management and Oversight
- Procurement and Assistance Services
- Travel Services
- General Support Services
- Human Resources
FY 2012 PPHF Activities

• $35 M to Healthcare Surveillance/Health Statistics of which $27 M went to NCHS for the following:
  • NHIS
    • Additional questions to monitor ACA
    • Expanded sample size from ≈87,500 persons to ≈108,000 persons; more state estimates
  • NAMCS/NHAMCS –
    • Increased sample size from ≈3,000 physicians to ≈20,000; more state estimates
    • Cardiovascular disease look-back module collected additional data on patients with heart disease and stroke
• Funded six states to implement electronic birth record systems and transition to 2003 birth certificate
• Monitor implementation of NHANES National Youth Fitness Survey
FY 2013 PPHF Activities

• $28 M proposed for Healthcare Surveillance/Health Statistics (NCHS share to be determined)

• Proposed activities include:
  
  • NHIS
    • Additional questions to monitor ACA
    • Continue expanded sample size; more state estimates
    • Testing to add biomarkers (height, weight, BP, dried blood spots
  
  • NAMCS/NHAMCS
    • Continue expanded sample size to permit state-specific estimates of clinical care provided in physician offices and Community Health Centers, including primary prevention and clinical management of risk factors for heart disease and stroke

• Fund states to implement electronic birth record systems and transition to 2003 birth certificate and EDR expansion.
Responding to Data Needs: Monitoring Changes in Health and Health Care

- Existing questions on NHIS and NAMCS/NHAMCS provide baseline and trend data for items including:
  - Health insurance
  - Access to health care
  - Care provided in physician offices, emergency and outpatient departments and community health centers

- New questions added to NHIS address targeted issues (ex. financial burden of medical care)

- Added NAMCS/NHAMCS cardiovascular disease look-back module

- Larger NHIS and NAMCS sample sizes allow more state-level estimates
Percent of adults aged 19-25 with health insurance, by coverage type, and percent uninsured: 2009 – Q3 2012

Responding to Data Needs: Targeted Populations

- NHIS is collecting sexual identity for the first time
- Completed NHANES National Youth Fitness Survey in 2012, first assessment of youth physical activity in over 20 years
- Continue to oversample Asian Americans in the NHIS and NHANES
Responding to Data Needs: Monitoring Long-Term Care

- The new National Study of Long-Term Care Providers (NSLTCP) will replace NCHS’ previous periodic nationally representative surveys
- NSLTCP will be conducted every other year starting in 2012
  - First data release: late 2013
Responding to Data Needs: Innovative and Complementary Survey Designs

- Testing methods for collecting biomeasures in the home as part of the NHIS
  - Height
  - Weight
  - Dry blood spots
  - Blood pressure
- Launching a web and phone follow-back survey with sample of NHIS respondents: ACA-related questions
Responding to Data Needs:
Improved Timeliness for Vital Statistics

• 2011 preliminary reports for births and deaths published 9 months after the close of the year ... Best in many years.

• 2012 preliminary reports will come out even faster ... late this summer!

• Final files released earlier

• National Death Index more current and flexible

• Fetal death reports and data will be caught up this year: 2007-2011
Responding to Data Needs:
*Health, United States 2012*

- Release expected in mid May
- Special feature: Emergency Care in the United States
- New interactive *Health, United States, 2011: In Brief* lets users customize charts and tables (2012 release later in summer)
THANK YOU!
