

Chilopsis linearis 'Burgundy'

Burgundy Desert Willow

TREE/SHRUB - winter deciduous.

To 20' high, to 20' wide.

Open, airy structure.

Leaves slender, drooping, willow-like.

Many large, deep burgundy-colored flowers - summer.

Cultivar propagated from cuttings.

Full sun to part shade depending on the location.

Frost resistant although prolonged frost may freeze the plant.

Will resprout from the crown.

Deep-water 1 - 2 x /month.

Fast growing.

Gets covered with blossoms.

Attracts hummingbirds.

Can be pruned.

Good slope stabilizer.
